Comments:

I respectfully submit the following comments on the Roca Honda Resources Draft Environmental Impact Statement (DEIS). I urge you to select Alternative 1, "No Action," for the following reasons:

Roca Honda is a waste of NM water. At a time of drought and increased water consumption, we cannot afford to appropriate water for commercial purposes. We need to use our resources for the good of the community as a whole.

Impacts to nearby communities are not being considered. Communities from this area have experienced tragedy in terms of recent history and uranium cultural sensitivity should also be considered.

Radioactive waste being transported through our communities pose a major threat to the population as a whole.

Thank you for considering my comments and I look forward to reviewing the final plan.
