Comments:

Once a valuable mineral deposit has been confirmed on multiple-use public lands, I regard mining as the highest and best use of the land. No other land use could come remotely close to providing the same benefits related to general welfare of our Nation.

There will always be "NIMBY" objection to mining, but for the welfare of the 200 (+) million citizens who's "backyard" is not in New Mexico (and who will directly benefit from mining on the Cibola NF), I urge you to carefully consider the economic and social benefits that can be provided from a carefully designed and well-monitored mining plan.
