In Support of Active Forrest Management

I am writing in support of active forest management in the western part of NC. I hunt grouse and the last decade has seen serious neglect on your part to provide early growth habitat for grouse and other upland species. I encourage you to incorporate responsible logging, burning and clearing into your forest management plan. Large swaths of old growth trees may look great to the eye, but hold little benefit for grouse, turkey and quail.

Thanks for your time.

Joe Kelly
