Nantahala-Pisgah Forest Plan Update

PLEASE stop giving Timber corporations access to the American people's land. Loss of trees have a serious impact to forest/environmental health. Timber corporations cannot be trusted to take care to leave as little imprint on the areas in which they work in amongst the forests or to only go after old growth trees when all of these other beautiful new growth trees are all around and there for the taking as they see it.

If you understand the underlying effects above, this is not just about trees but the entire symbiotic ecosystem that relies on these trees to be there. Even 'old growth' trees the Timber corporations supposedly just go after.
