Nantahala and Pisgah National Forests Plan Revision

Heather Luczak

National Forests of North Carolina

NCplanrevision@fs.fed.us

I oppose USFS opening up nearly 70% of Nantahala and Pisgah National Forests for logging. I suggest that the new plan includes provisions to prevent non-native plants, pests and pathogens; protects roadless areas and potential wilderness areas from commercial logging and road building; continue with current protection strategies of stream buffers and old-growth forests; and, focus on ways to restore the most degraded ecosystems in the National Forest.

Thank you for attention to my concerns.
