No logging Pisgah-Nantahala

Dear Heather Luczah - and to whom else it may concern,

Please do not allow logging of the 700,000 acres in the Pisgah-Nantahala forest!

There are so many people who have created business opportunities for non-timber products.

From herbs and mushrooms, to furniture and found down wood opportunities, through tourism, and finally the health of the environment: please choose this as the better options.

With logging comes infrastructure expense, erosion, carbon dioxide into the air, and the loss of habitat for all species. it is just devastating to keep fighting for what we have learned.

Let wood come from tree farms - not our wild lands. There is more than enough land that can be replanted and has been replanted.

Please let me know what more i can do to be part of a better, more fulfilling for the community, and better for the environment plan.

Thank you.

Sincerely,

Lisa Ziperman
