Comments:

In regards to the letter your organization sent us re-travel mng plans for Rico-W Dolores area. From what I see it seems your main goal is to get rid of a number of single tract (motorcycle only tracts). I do not really see any addition of ATV routs, I don't mean UTV, side by side, which to me should be under the same catigory as JEEPS.

I would like to have seen the addition or incorporation of some "ATV" routs into some of the single tract routs where possible. Especially in the Stoner mesa and Taylor mesa area. We are property owners on the W Fork, above W Dolores camp ground.

Give the overall increasing age range of the general population the FS would be trying to do a little more "catering" to this ageing population not the other way around.

In general though I don't see any real fault with this general proposal other than lack of "ATV" access imprvements.

Regards,
