Rica/West Dolores TMP Action Proposal-Comments

Dear Mr. Padilla,

I have been riding and using the San Juan National Forest trails for over 50 years. In the time motorized use has been reduced by at least 80% No other user group has been punished as bad as the motorized users and they do more to maintain,clear, cut downfall and repair in the Spring than anyone else. The guidelines in place for trail use should be left alone as they are too restrictive now. No need to set time limits for motorized units as they have been restricted enough. Furthermore,, it is in the Spring that they clean trails. I have seen no scientific proof that motorized activity has had any detrimental effect on wild life. Thank you, Douglas M. Sandefer
