Comments:

I am writing to express my total opposition to the proposed coal exception. This ruling makes no sense. The United States needs to eliminate its use of coal because of the increasing threat posed by global climate change. Of all the fossil fuels, coal is the worst choice in terms of its impact on the climate. This is clear to anyone who is familiar with the issues. Why is Forest Service policy headed in the opposite direction? Is it because the Forest Service is under political pressure to do so?
