Comments:

Dear Sirs/Madams:

With all the publicity about how endangered we ALL are with respect to severe changes in our climate caused by many factors, one of which is coal burning, one would THINK starting up a new coal mine would be the furthest from anyone's mind. Apparently not.

To add to the disastrous end-result of that new coal mine, destroying the landscape of pristine areas to build a road for this environmentally destructive mine, is unconscionable. What does it take for the leaders of our local, state and federal governments to do what NEEDS to be done to protect the very planet we live on?

I am starting to believe there aren't two brain cells, collectively, from any of you to rub together to jump-start some critical thinking! I mean, really. Is money more important to you than to destroy the very planet we live on...even more important than the lives of your children...your grandchildren?

If you were to have a theme song, it would be:

Money money money MONEY...MONEY!!!
