Comments:

Please continue to manage the area without the exception. Do NOT allow "temporary" road construction on the Grand Mesa, Uncompahgre and Gunnison National Forests. There is no such thing as "temporary" roads.

Once roads are made, which result in flora and fauna destruction, people will also drive off-road vehicles and other vehicles in, even if posted for no public use. Forest fires may also result, from people camping where they are not supposed to be. Destructive mining for corporate profit should not be permitted to destroy the people's national forests.

Our family hikes in these forests where we are permitted, and we want to keep the forests clear of back country roads.
