Comments:

We should know by now that coal mining is wrong for the future of our country as we must control climate change. Mining coal should be phased out and replaced by clean power. The money going into coal today benefits few and that money should be put into clean energy. As a nation, we have promised the world to reduce our need for coal and thus keeping the roadless rule in this area is essential.

National forests belong to all citizens of our country, not companies who mine and leave destruction behind. Many of our forests are being destroyed by pine beetles and it is because of global warming that they can cause such destruction.

Pleas do not make it so easy for BIG COAL to destroy our National Forests. Thank you.
