Comments:

This is a horrible idea to open this area to coal production. We are experiencing global hardships due to GHG emission's which experts have stated are killing us all slowly. Coal is not the answer, it is totally destructive on so many levels, air, water, soil as well as human beings and the animals that inhabit this area. 6 miles of roads and 48 drill pads is totally unacceptable. The cumulative impacts are staggering. I urge you to just say no!
