Comments:

This area should never be opened to road construction and should remain pristine. Additionally, it should be protected from any kind of mining, logging, or other interests so that animals, plants, etc. can remain true to the ecosystem of the environment. As a hiker, I appreciate areas of natural beauty and would hope that my progeny and generations after them can see the area in its natural state as I have. We need to develop other alternatives rather than those of fossil fuels, such as coal and oil. I firmly believe that we need to explore and use more energy sources such as solar, wind, hydro, and geothermal sources to stop our reliance on the oil/gas industry and to help elevate environmental concerns that these products effect.

Thank you for letting me voice my concerns. I look forward to seeing no coal, mining, or logging in this area in the future.
