Comments:

Dear Sir or Madam,

In light of the fact that coal as a primary energy source is in decline, I do not believe it is necessary to reinstate the North Fork Coal Mining Area exception. Roadless areas are few, and require diligent protection. They are extremely valuable and they must be preserved for future generations. Therefore, I urge you to continue to manage the said area without the exception. I agree that you should determine if corrections to the North Fork Coal Mining Area boundary should be remedied to adjust for clerical errors.
