Phone: 970-243-4304

Comments:

The Colorado Exception to the roadless rule should be made permanent. The coal seam continues beneath the roadless area, so it is ridiculous to cease mining at the roadless boundary. And even more so because of the notion that stopping coal mining could have an effect on global temperatures.

Roads into the area for the purpose of venting methane should be closed to the public, and reclaimed when no longer needed.
