Comments:

National Forests are a great asset to our natural resources. Properly managed, they are a source of oxygen and wood, diminishing items in these days of exploitation of wild lands. Please consider retaining the roadless areas of these forests. We should also be getting past the era of big coal, the most egregious carbon dioxide polluter. Please work to devote resources to sustainable power sources, i.e. wind and sun. Please assure animals and humans a safe and healthy environment for the future.

Thanks,

Lee Fairbanks
