Comments:

How sad it would be to continue the destruction of America the Beautiful, for some short term financial gain, and which gain would not only impact our country, but would continue us down the road of world-wide effects of climate change! These lands are the birthright of ALL Americans living now and those who will follow us into the future. Leave something for Nature and for the generations to come.

One has to ask who really stands to gain from these ill-conceived proposals. Follow the money.
