Comments:

our timeless, roadless areas are far more precious than the temporary use of coal-fueled power.

in light of rising seas, crazy and destructive weather and the havoc on agriculture caused by atypical rainfall, i find it incredible that this project would even be considered.

just think of the beauty, wildlife and ecological systems that would be destroyed. very troubling.

please abandon this totally unnecessary project. the development budget would be much better used to build solar panels and wind mills. let's save the human race instead of the dirty energy industries.
