Comments:

With the Clean Power Plan finalized, Colorado is currently underway in making a state plan to cut carbon pollution from coal-fired power plants and incentivize renewable energy projects in the next 5 years. Opening 20,000 acres of roadless forest to the mining of 170 million tons of coals that will displace renewable energy from the grid and emit millions of metric tons of carbon pollution each year is counterproductive to Colorado's and the rest of the country's priorities.

I oppose the amendment. Please adopt the "no action" alternative. Thank you!
