Comments:

This is absolutely outrageous! This would be handing a pristine forest which is home to diversified wildlife, and helps to protect our environment, to a company that will completely destroy and pollute this incredibly valuable natural resource!

The very thought of what is being proposed makes me physically ill! This company shows no regard for responsibility to the environment, and having just filed for bankruptcy, also shows no fiscal responsibility!

Bowing down to such corruption is unthinkable!

We must focus on developing alternative sustainable and renewable energy sources, which we have in abundance here in Colorado.

Continuing to go down this insanely destructive path only serves a few corrupt and greedy individuals and continues this horrifically catastrophic irreparable damage to the planet, our environment, and indeed our very health, safety and lives!
