Matthew O'brien CA 92129-4453

"Allowing short term profits for one company in exchange for long term, permanent damage to the environment is not defensible. Please do the only sane, sensible thing."

Kathy O'brien CA 95560

"Stop turning our forests into Wastelands all for your Greed and Profit. This planet needs the trees not your damn coal."

Mary O'brien CA 95842-3114

"The last thing we need is new coal mines or new oil and gas wells. We need to preserve forests and not ruin them with unnecessary roads and obsolete mining. Hello! We have to phase out fossil fuels, and not add more to the problem of climate change and pollution. The Paris talks are going on, because this is too important to ignore. How dare our gov't even consider allowing new coal mines, especially in forests! It's a no-brainer. Deny new permits to mine on public lands. Don't ruin good forests with mining, construction and new roads."

Charles O'brien IL 61401-3038

"Leave our pristine forests alone ."

Mildred O'brien IL 61874-8100

"Stop coal mining, period!"

Jack O'brien NY 14220-1946

"Do not allow the loophole in the Colorado Roadless Rule that would enable arch coal to to add more climate pollution to the atmoshere."

Beth O'brien NY 14617-2535

"Stop the madness!"

Emmanuelle O'brien PA 19130-3207

"It's time we say no to a cause that was already judge in the favor of Earth and its inhabitants."

Chris Obrion VA 23233-2638

"Bulldozing pristine forests - that soak up carbon! - in oder to mine coal - a dirty fuel that accelerates climate change - is insane. These are our lands and the lands of our children. Letting Arch Coal profit from the destruction of our futures is the cruelest sort of injustice. Please deny attempts to build roads and extract coal in the Colorado forests."

Lynne O'carroll NJ 08873

"In an era of global warming the U.S. Government should not encourage the production of dirty coal. It certainly should not destroy America's irreplaceable wild lands to,do so. This would be a crime."

Barbara Oceanlight CA 94086-7382

"All the natural lands we still have must be preserved from now on."

Brian O'connell

"Please protect what is left (and there isn't very much of it) of our wilderness. The greed of the few does

not outweigh our duty to preserve our country."

Katharine O'connell OH 44121-1747

"We must protect our forests and habitat both to keep carbon out of the atmosphere and to preserve eco

systems."

Margo O'connell OR 97211-3137

"There are so few true roadless wilderness areas left. To destroy Arch wilderness for the profit of a single company would be a travesty. Please hold this area in trust for future generations. Remember why you chose to become a forester: because forests matter to animals, to people, and to the planet. The wilderness is more valuable as a carbon sink than the coal underneath it is as an energy source."

Mary Lou O'connell PA 15001-4851

"Please keep the Colorado Roadless Rule as it is. We cannot afford to wipe out any more forest. It is wrong to pave paradise to mine more coal. Let's use our knowledge to come up with an alternative for coal."

John And Jeanne O'connell WI 53103-9717

"We have enjoyed the Forest Service lands camping and hiking in CO since the 1950's and have a daughter who recently retired from the USFS and spent her final years in Colorado. NO new ROADS for what hopefully will be unneeded coal for our future."

Kevin O'connor CA 95616-4133

"This must stop"

Cathy O'connor IL 60451-5603

"Please don't allow this to happen!"

Margaret O'connor MN 56001-3138

"It is imperative for our health to protect and preserve our forests. These concerns for our health and the health of our earth are of vital importance and therefore we ask for urgent action to stop the proposed bulldozing of forest land."

Eileen O'connor NY 10701-1051

"Please....stop."

P. A. O'connor PA 17268-8286

"Iforest svc, pls PROTECT our irreplaceable forests!"

P. O'connor

PA 17268-8286

"Other forest Svc is supposed to PROTECT forests. PLEASE DO NOT ALLOW DESTRUCTION OF FORESTS."

Ellen O'connor VA 22206-1824

"Our forests are integral to our response to climate change. Do Not destroy forests for your roads or any other reason."

Barbara Ocskai WA 98296-6193

"It's time now. We are responsible for our children. The future is in our hands."

Lucrezia Oddie HI 96708-5529

"Coal as a fuel is archaic, unnecessary and extremely destructive. Stop enabling it's expansion!"

Thomas Odell NY 12804-6601

"Keep coal in the ground to save the planet."

Ken Odell

TX 76135-1736

"Coal = CO2 in the atmosphere, and Mercury as well. We will be better, in the long run, to leave it in the ground. And leave the forest alone!"

Philip O'dette NY 14507-9761

"Until January 4, the Forest Service is taking comments on its proposal to pave the way for Arch Coal--the second-largest coal company in the United States--to bulldoze across thousands of acres of pristine roadless forests. The agency is proposing to reopen a loophole in the Colorado Roadless Rule that will make it possible for Arch Coal to reap profits while adding 130 million tons of climate pollution to our atmosphere, causing up to \$13 billion in damage to the world's economy and environment. The climate costs of this proposal are simply too high. For this reason, this loophole would set a dangerous precedent for our wild lands, and we can't let it happen. Speak out against this destructive proposal now!"

Monica Odgers WI 53027-1843

"Humans are called to be compassionate caregivers, protectors and stewards of the planet and its beings.

Helping not harming."

Gail Odom

CA 94707-1309

"We do not need to mine for more coal!!!Please save mother earth."

Mr & Mrs Rg Odom FL 33062

"ARCH COAL JUST DOESN'T GIVE A DAM ABOUT THE CITIZENS OF THIS COUNTRY AS LONG AS ARCH COAL GETS TO STUFF THEIR POCKETS"

Eugene Odonnell IN 46038-3203

"Why would anyone agree to destroy forests to obtain the dirtiest of dirty fuels? Stop this madness! Keep the coal in the ground and the trees on top of it!"

Daniel O'donnell WI 53227-3913

"you have to stop destroying our woodlands unless you like carbon flavored coffee"

Clive O'donoghue TX 75601-3537

"Leave it in the ground! The future of the world is at stake. Does no one have children with their future and their children's children's future?"

Lauren Oehler CA 95776-5379

"No coal mining or coal use, period!"

M Ofenloch

NJ 07001

"National Forests are not supposed to be boons for coal, gas, oil, and mineral mining. The trees help to hold CO2, whereas coal will add it to the atmosphere. No mining in We the People's Nat'l Forests!!"

Jean Marie Offenbacher NY 10011-2104

"When I read that the Forest Service would even contemplate such disastrous measures, I am reminded that they are more aptly named the representative agency for deforestation advocacy."

Jeanie Ogden OR 97759-1470

"The world is taking steps to stop climate change. Coal is not the answer and the United States needs to lead by example."

Robert Ogden TN 38462-5305

"Do the right thing. You will sleep better tonight. Thank you."

Nanette Oggiono MA 01568-1424

"Please keep our forests preserved for generations to come! We have to do the right thing for them and all the creatures that live there."

Avis Ogilvy

LA 70118-4057

"This proposal is an outrage ! There should be NO FOSSIL FUEL EXTRACTION ON PUBLIC LANDS. Least of all roadless areas. What can our Forest Service be thinking of ?"

Sterling O'grady CA 94559-4143

"Please don't reopen the coal mining loophole in the roadless rule. Coal mining process leaves behind a toxic wasteland and will destroy the entire forest, not just the areas where they mine."

Linda Ogren ME 04910-0185

"You need to help the environment not hurt it."

Caitlin O'heaney NY 10524-3414

"Do NOT allow Arch Coal to earn profits from mining our VIRGIN LAND. Do NOT re-open the loophole in the Colorado Roadless Rule that will let this happen!."

Karenn Ohlinder

"This forest belongs to me and all Americans. It is simply wrong to damage it to benefit one corporation, causing huge damage to the entire planet in the process. This IS the tragedy of the commons!"

Lynda Ohman WA 98311-9159

"As a teacher, I find it rather difficult to even mention the topic of coal as a fuel source, to my students. There is no intelligent reason to continue its usage, when the facts are in and scientifically supported. The very life-saving trees you take away cannot totally eradicate the irreversible damage you do to plants, wildlife, and humans. There is no justifiable cause, in this day and age. Put your scientists to work on green energy and how to bring that efficiently and affordably to fruition, and you'd be doing good for all."

Rajesh Ojha

CA 91335-3909

"At a time when we're making significant progress toward a clean future with renewable energy,

investing further in coal is a terrible idea."

Joel O'keefe

"Stop roads from being bulldozed across roadless forests in Colorado for coal mining, degrading habitat for black bear and elk, goshawk, lynx and trout....all to benefit one corporation, Arch Coal.. Keep the Colorado

Roadless Rule as it is!"

Allison O'keefe WA 98119

"There are better ways to do this."

Dan O'keefe WA 98013-0439

"WE don't need more coal to burn. WE need sustainable fuels development. Transform coal jobs into new fuels jobs."

Celia Okelley AL 35401-5922

"Please don't destroy our forests and allow coal to be mined when there is a serious climate problem caused by fossil fuels. Keep the coal in the ground. Don't allow a loophole to be used just so a company can make huge profits off of something so serious for mankind's future."

Kelly O'kief

HI 96768-8473

"Please stop thrashing our environment for corporate profit."

James Okrzesik IL 60046-9587

"There roadless for a good reason!!! Stay out of our land. Greed is always behind destruction of the earth."

Carlene Okula CT 06111-3722

"Please protect our lands from excessive bulldozing. We need a balance between profits and preserving natural habitats. This would be a staggering amount of deforestation."

Michael Olague CA 91761-0143

"We only have 1 earth!!! There's no reset button."

Rick Olanoff NY 13214-1906

"It's more than time to go solar and wind--green, renewable, safe and to protect our forests!"

Kathy Olavarri CA 95033-8702

"Please save our forests and the earth!!!"

Audre Olenick PA 15108-9667

"Stop this endless destruction of our natural resources."

Paul Oligney WI 54311-6598

"We need to keep dirty energy in the ground if we want to live a healthy future and leave a healthy future for our kids and grandkids. Most importantly we need to protect the remaining habitats of our natural ecosystems or we too risk extreme starvation and great biodiversity loss. We need to learn to live with nature and use its resources in a clean, efficient manner that provides benefit to all creatures, not just short term profits of a few."

Erin Oliva

CA 90034-3021

"If we don't protect our natural resources we're going to lose them forever. We cannot afford to destroy our precious forests."

Tobias Olival HI 96727-0183

"Aloha ina"

Yvonne Olivares MD 21042-4296

"Please don't allow this to happen. The short term benefits for 1 company will cost more than the long-term costs to our health, wildlife and our environment overall."

Consuelo Olivarez CA 90291-3964

"We need our trees for air. Forest wildlife will have nowhere to go and will die. Eventually nature will run its course leading to disaster for us and generations to come."

Doug Olive

IL 61820-4760

"The US needs to explore new sources of energy and leave coal in the ground."

Jared Oliver

DE 19702-1914

"It's time for us to keep our roadless wild areas undeveloped. Protecting habitat and limiting our impact on climate change take precedence."

Nathan Oliver MN 55416-1954

"The time has come..."

Suzanne Oliver NC 28144-8505

"Coal pollutes. Wind does not!!!!!!"

Russel Oliver NY 12446-0073

"This destruction of MY/OUR roadless forests must STOP."

Lisa Oliver

WI 53714-2237

"Our planet needs our forests to survive. Stop Arch Coal and refuse to reopen a loophole in the Colorado Roadless Rule!"

John Olley DH7 8XF

"Trees are life keep the worlds forests intact"

Kat Olmstead NY 13312-0171

"We need to STOP tearing down our beautiful natural landscapes. We have the means to build solar, wind, hydro, and biomass energy systems, so we need to build them, and move on from fossil fuels!"

Dawn Olney KS 66207-2218

"Coal companies care only about profit. We need to protect what natural places we have before they are gone forever, leaving behind nothing but waste and toxins. Please protect our planet."

Esther Olney

NC 28655-9411

"Stop this outrage to the earth and all Americans with conscience"

Joseph Olonia NM 87110-3415

"Drilling has become a sickness, a desperate attempt to extract miniscule amounts of energy at the expense of pristine lands."

Barry Olsen

"This is wrong twice over! We should preserve wilderness areas in our national forests AND we need to leave coal in the ground and take action to eliminate our dependence on fossil fuels."

Karen Olsen CA 93446-2505

"Coal is a dirty fuel. To seek it while ruining out wild places is the worst kind of public policy."

Karen Olsen OR 97458-0702

"All around bad idea on a cost vs benefit basis."

Corey E. Olsen WI 53018-2441

"Stop the destruction."

M Olson CA 94086

"This is so obvious I'm surprised and sad I have to say this"

Victoria Olson FL 33309-4611

"When the last tree has died, the rivers are all poisoned and the last fish is caught & the ocean is dead maybe you will realize you can't eat money. What part of America needs to switch to GREEN Energy are you not understanding? Greed and Money is destroying the planet we live on."

David Olson IL 61238-9249

"Stop this injustice. Destroying our land for this huge company is not right. Save our land."

Phillip Olson MI 48214-2891

"we all need more fresh air. Not the burning of more dirty coal!!"

Glen Olson

MN 55123-1822

"Climate change caused by the burning of fossil fuels threatens the entire planet. It's time to move away from coal and oil and seek renewable energy sources. Leave the coal in the ground."

Bradley Olson MN 55412-2215

"Really?"

Mary Olson

VA 23693-3715

"We MUST preserve these pristine forests!!! Many, many years to regrow them!"

James Olszewski NJ 07305-2045

"God IS watching! Do what's right, not what's easy."

Marlene Olveda OR 97227-1146

"This is absolutely unnecessary."

John W. Olver CA 93950-3106

"Forests are good, coal is bad. There is no longer any argument to that statement. Burning coal will bring misery to our descendants. Get serious about changing the world's energy equation."

John Omaha CA 95402-1531

"Leave it in the ground. Invest in solar and renewable, green energy. Leave it in the ground."

Kathleen O'nan CA 90039-3401

"Please do not let these beautiful lands be destroyed by Arch Coal. Protect our land!"

Elizabeth O'nan NC 28752-6228

"Ban dirty energy extraction faction from public land. Preserve our forests don't manage them to oblivion."

Eleen Onda

AR 72632-9731

"We need trees for our very life."

John O'neal

NE 68127-4849

"I just saw the pictures of air pollution in China which is largely caused by burning coal. Don't make it worse. No coal mining in our forests!"

Amy O'neil

NJ 07045-9009

"We are the keepers of the earth. Stop dirty coal mining to save our forests and it's wild life!! I want cleaner air not more pollution!"

Larry Oneill

"Please no coal mining or exploration on Americas forests. Don't rape my forests for your corporate profit of which you share non with me."

Arlene Oneill NJ 07624-1323

"yes, stop coal mining on roadless forests."

Vicki O'neill

AZ 85119-9680

"Stop the coal mining in our precious few wilderness areas. This coal mining devestates our wilderness ans the wildlife that inhabits the areas. Once gone..these areas are gone forever."

Hugh O'neill CA 92220-9522

"Coal is one of the most polluting fuels and contribhtes massivly to CO2 emissions and aa host of other noxious by products. Has anyone given thought to what conditions we may face if the widfires of the past few years in the western US continue to get worse and if we had a "Katrina" and a "Sandy" and a few more besides every year rather than spread out several years apart? We should halt any coal production and burning. Especially projects that do even more damage to the eco system during the extraction process"

June O'neill

ME 04107-2005

"Please leave the roadless wilderness in tack. We have taken over too much habitat and we need to be

careful moving forward. Since we are working on Environmental Warming it is hard to believe plowing down pristine forest in lieu of coal is a well thought out plan."

Lucy O'nesl

OR 97405-1477

"Thank you for reading my letter. 2 reasons: protect this wilderness Stand for our air and ozone against burning coal Thank you"

Wanda Onishi HI 96797

"Don't let Arch Coal bulldoze the forests."

Rachel Onstott KY 40206-1674

"Forests are an irreplaceable part of a sustainable future. Whereas coal is detrimental to a sustainable future. DO NOT CHOOSE COAL OVER COMMONSENSE!!!"

James Onysko OH 44081-9622

"With Earth's precious ecosystems at the tipping point, it is irresponsible and dangerous to coal mine pristine forests."

Kay Oppliger MI 49077

"Let's not destroy the forests by paving roads for big trucks to get at the coal mines. The coal companies don't pay enough in taxes to make it worthwhile or rehab what they destroyed."

Tara O'riley

CA 95401-5733

"This kind of destruction of our environment needs to stop. Close this loophole."

Patricia Orlinski AZ 85351-2246

"How ridiculous. Here we have a Conference on Climate action going on in Paris right now, and a coal company has the nerve to go about plowing up trees and damaging the environment and air as much as possible? What?"

Barbara Orlovsky TX 75214-5345

"To bulldoze carbon absorbing forests in order to dig up carbon- polluting coal is wrong for our wild lands and wrong for a warming planet. DO NOT allow Arch Coal to invade the Colorado forest wilderness and DO NOT make an exception to the roadless forest regulations."

Valerie Orner CA 94403-3946

"We must stop destroying precious lands to facilitate greed!"

Susan O'rourke FL 33710-2141

"We need this to stop-the damage to our environment is far to costly and it will only benefit Arch Coal"

Earl Orr OK 74063

"stop it"

Noel Orr

WA 98155-2334

"Would you just do the right thing and stop letting coal and other industries destroy our Mother Earth?!?!?"

Jenne Orr

WI 53716-1467

"We need to stop using coal, period. But we certainly need to ensure that coal mining is NOT destroying what little wilderness we have left. Do not allow mining in forests, parks, etc."

Mary K Orrange CA 94040-2316

"It's imperative that you forbid Arch Coal from destroying acres of pristine roadless forest. These wild places are our nation's precious and priceless heritage and must be protected from the interest of greed."

Crystin Orser OR 97211-2426

"No. PLEASE do not allow Arch Coal to pull in the profits at the expense of our atmosphere and wild forests! Horrible!"

Nancy Orsetti DE 19711

"SHAMEFUL ARCH."

Juanita Ortega AR 72117-2453

"We need to save our forests and stop polluting our planets earth. STOP THE BULLDOZING"

Charles Orth-pallavicini NY 10128-5241

"The cost to the environment would be way too much and not in any way worth it in destroying the habitat of much wildlife and irrevocably contaminating the watersheds that would be affected. We have too little sources of fresh, potable water left as it is. The scaring and pollution of the landscape by the coal industry not only shortens and makes more miserable the lives of the poor, but robs future generations of their local nature's beauty, giving the a sad, broken, dispirited land in which to be raised with less hope than if we followed the biblical injunction to be caretakers to our good earth."

Maria P. Ortiz CA 93030-2597

"I want clean energy to start now, not later."

Jenny Ortiz

CT 06237-1304

"Please stop badgering our environment and creating more carbon footprint. If you keep doing this, in a few years, the human race will have nothing to live on."

Sebastian Ortiz GA 30606-6603 "#N/A"

Carol Ortiz

TX 77316-2908

"We have got to stop destroying forests and burning coal. Our continued existence on earth is in peril!"

Shyama Orum NY 10001-7933

"Public lands belong to the people not the profiteers."

Peter Osborn NY 14445-1600

"this is morally wrong"

Michelle Osborne

TX 76118-6115

"When will the American people take precedence over business? PLEASE stop destroying the only home we have."

Kate Oscar

NY 13339-1204

"Every forest you are destroying all the animals and life you are destroying along the way isn't worth the amount of coal you could obtain. Think of I in terms like this, would you want someone to destroy where you

live and kill you along with it just for some small amount of coal."

Daniel Oseguera FL 32824

"All climate data point to we needing forests more than ever. If we are to survive, we need every tree available today and many, many more planted, just to help somehow manage the generated amount of CO2. Now you want to cut more trees, to dig and burn more of the one thing that got us here in the first place? How intelligent is that?"

Alex Oshiro

HI 96822-5824

"Please stop raping and polluting our planet for profit and greed!"

Emma Osiecki UT 84770-7375

"Let the forest be, what you are wanting to do is not right. Sincerely, Emma Osiecki"

Sharon Osika-michales NY 13152-9384

"Do not contribute to climate change. If we have any hope of future generations being able to live on this planet, fossil fuels must be kept in the ground. Coal is the worst of them. My grandfather was killed in a Pennsylvania coal mine; I was never able to meet him. I'm sure black lung would have ended his live earlier than normal had he not been killed. This is the time to invest in renewables, not in finite fossil fuel resources. It CAN be done. View <http://thesolutionsproject.org/> -- Stanford University et al plans for our energy future for each state in the U.S.."

David Osinga CA 94901-1282

"Now is the time for a robust investment in the development of cleaner technology to generate energy! Stoo squandering the health of our ecosystem on old dirty technology! Legislate change."

Rhea Osland IA 50141-7708

"I'm very angry that we keep destroying this planet and all living things on it because of greed. Enough is enough!! Stop Arch Coal."

Sanda Oslin

MN 55783-8743

"I don't understand why a "Forest Service" would advocate destroying ecosystems by cutting down trees to put in a tar road."

Harriet Oster NY 10021-2825

"Once wilderness is bull-dozed, it's gone forever--for our children and future generations. What we're left with is the pollution."

Gregory Osterhaus VA 24018-1307

"Stop destroying our natural resources for the "benefit" of dirty fossil fuels. my gosh, do any of you

people have children to think of?"

Dawn Osterud FL 33615-1583

"One would think that an agency with the title of "Forest Service" would be known for being a supporter, defender, caretaker, a champion for the forests, and all it's inhabitants. Not people that would allow even one person, or many, to bulldoze thousands of acres of pristine forest. To the detriment of the land, and all the animal life. Even if you don't care about the animals (you're in the wrong job), consider your children, and your children's children. You would be causing billions of dollars damage to this planet's economy and environment. All to mine fossil fuel? Which, by the way, is on it's way out. Do your research. This is a no brainer. The loophole in the Colorado Roadless Rule, needs to be super glued shut. FOREVER. Reopening it, would not be "Caring for the land, and serving people ". The forests are your responsibility. Protect them. Sincerely yours
Dawn Osterud"

Gary Ostlund NC 28374-8421

"Have they not heard that coal is obsolete....? GOO"

Julie Ostoich CA 95826-4542

"Keep the loophole closed forever and keep the forests and wild."

Brian O'sullivan ME 04079

"stop the destruction now"

Allan Oswald FL 32810-6399

"We can do so much better than coal!"

Mahmoud Othman MI 48170-4570

"Let's stop the genocide on Plante earth and let nature be nature and stop destroying God's beautiful landscapes."

Margaret Othrow NY 11238-1804

"Don't be giving away America's pristine wilderness to benefit the producers of a fuel we are trying to eliminate!

Remember Paris and the COP21? You would be ENABLING! Don't do it!"

Mary Anne Otoole IL 60005-1819

"Stop taking carbon out of the ground. But if you must, stop trashing the forests on the trip"

Christina O'toole WA 98512-6206

"This plan is a big lose-lose."

Jane Ott

"Please stop coal mining in our U.S. forests. We must preserve our forests for the sake of our environment, our wildlife, and the future of our country."

Ted Ott

IL 60181-2876

"Leave rich oxygen producing forests alone. We need Oxygen more than we need carcinogenic producing coal!"

Carol Ott

TN 37415-3917

"Please Please do not let this coal company or any others destroy our precious national forests. Put ethics and morality above money for a change!"

Ardys Otterbacher NM 87701-0898

"You've already seen what this does - decades of strip mining in the Appalachias and elsewhere - levelling mountaintops, leaving the landscape as dead and barren as the Moon - it's horrible and it is completely unnecessary. When the planet's resources run out THERE WON'T BE ANY MORE. They need to invest in some other form of energy, or just continue our extinction."

Elaine Otto

"I oppose this proposal and ask that you reconsider."

Charles Otto IL 60618-5713

"there are other ways to get energy"

Lori Otto

NH 03054-2933

"Please do not let the Arch Coal proposal pass. It is bad for our environment, it is bad business, and it is just wrong."

N Oure

VA 22193-1680

"WHY?!?!?"

Randy Ouren IA 51537-0229

"Please don't allow this forest area to be opened to roads for coal mining or any resource depletion mining."

Stuart Ours

NJ 07882-2406

"Coal, the dirtiest source of power from a global warming perspective, needs to be kept in the ground. Bulldozing trees to gain access to it doubles the climate change impact. Do not open this loop hole. Your grandchildren will thank you."

Sheila Out

NY 14850-6152

"No accommodations should be made to mine more coal. We need more renewable energy and less dirty fossil fuel."

Linda Outterson

"It would be tragic for the Forest Service to allow the destruction of pristine forest and enable further coal pollution of our environment. How would increased coal production and environmental destruction be a "service"? The Forest Disservice? Tragic."

Thomas Ouweleen CA 91505-2127

"Please keep this road in the bottle where it belongs. As we know, once the roads are built it's too late to stop the damage. Please consider that what the average people who use this forest get out of it is more important than what Arch Coal will do to it. Thank you."

Barbara J.b. Overbeck PA 19422-1328

"Everyone knows by now, coal mining is not the way to go. Only the coal mining companies are making out. It's bad for everybody else on the planet. We need new ways of getting energy that is a win/win for everyone, not just corporations. Stop destroying the planet. The ETs are watching!"

Marilyn Overton WA 98020-3541

"We want our roadless forests left intact. Stop the greed and disregard of Arch Coal."

Anthony Owen CA 95521-6471

David Paden KS 66044-3719

"According to Exxon scientists, the cost of burning fossil fuels is \$60 per ton of CO2 produced. Our government should be "renting" coal producing land at that rate. It would make places such as roadless forests much less appealing to these coal companies and make the true cost of coal more obvious. Stop new coal development and start encouraging renewable energy, which in terms of True costs is cheaper."

James Padier TX 76901-5591

"Hello, I am with a made up company that wants to bulldoze your entire lot and build a playground on top of it. I've provided myself the documents that I need to do so by paying off the local public servants to facilitate my destruction of your headquarters. You have no say in this and there is no recourse for the destruction of your property, that of which now belongs to me and I will be disposing of it. If you try to recover your lost goods, it will be considered theft and you will be shot to death by police in the streets without a trial, conviction, or due process. Now you know how all the citizens and the planet feel, because this is how you treat us and it is exactly the same methods you use and only because the U.S. is the worst atrocity to ever be wrought onto this planet and unless the U.S. is stopped it will destroy all life on the planet. I will never get a job and I will never pay taxes to petty criminal sacks of trash such as you. Since all you do is ruin everything you interact with, the best you will ever do is die. I hate you, I hate the U.S. and I will never have a life here, never get a job and never pay taxes to worthless pieces of feces that ruin everything, such as your inept selves. F YOU!"

These decimated lands can never recover and return to the pristine condition. Just when our President wants to reduce our dependence on coal due to global warming, you folks want to ignore what he says and go against the people's interests. "In the context of climate change, the protection of forested areas is a paramount concern and the only responsible approach to coal is to keep it in the ground. To allow the destruction of forest in order to facilitate the extraction of coal is a betrayal of the public trust, and is plainly inconsistent with the federal government's more stringent regulation of coal-fired power plants."

"In the 1st place we need to be replacing the use of coal. It is ruining our planet. It's hard to believe that coal companies don't care about the devastating effects of mining to Earth and they don't care how this will affect their grandchildren. Secondly, cutting trees depletes our oxygen level and destroys the source for carbon dioxide intake. It just shows how some people know nothing about how their actions affect the biology of the planet -or they are willing to cut their own throats to make more profit. Thirdly, this will cause destruction to the habitat of many species of wildlife."

"All current "ordinary" business practices must be reevaluated at far stricter standards now for how they impact the environment. U.S. citizens (and indeed global citizens) now have a new goal and expectation of our government for clean air and land standards. It may be a shock, inconvenience and even sacrifice on businesses -and even perhaps on some jobs and economy aspects in the short-term, but it is nonetheless a necessary new standard. Please do not open the loophole allowing Arch Coal mining in this sector. We must

now -and for years to come - carefully consider the long-term effect of every instance of damage and depletion to our planet and resources. If not now, when? We are responsible to future generations before we are responsible to any business goal now."

"Why am I against give-away mining? We do not need to "settle" the wild west. We don't want to give away the public trust. We don't need to wreck the environment, particularly WATER. Rivers and subsurface aquifers are precious. More precious than a quick buck. Virginia, Kentucky etc. think it is the days of the horse and buggy. They "salted the earth". Duke Energy is a criminal company example. The time released water poisoning tailing ponds I have seen end up a toxic legacy, which the mining industry abandons (bust), declares bankruptcy and laughs all the way to the bank. Boom Bust mining leaves the taxpayer "giving" away the family jewels for a long, ugly, costly that ruins water. We have extreme water pollution and costs-of those problems as is The mining act 1877 and amended especially BLM and NFS , etc. are need of overhaul and/OR administrative POLICY that protects the ENVIRONMENT. You are proposing to reopen a loophole, just so a coal company can a)destroy a forest that provides Colorado with clean oxygen, and b) put toxic pollutants in the air, not just by gouging out the earth, but also by selling the product that chokes up peoples lungs, degrades the planet, and the precious air we breathe, all of that so this company can make a lousy buck, on the backs of millions? Even though you know what the consequences will be? Have you lost your mind? It's time that morally corrupt officials get the boot, if that is the case, because the only way that would happen, is, if 'someones pocket was greased'!

Please, use some common sense for a change, think down the line, instead of fast profit for long term damage!!"

What has happened to that when the public continues to hear and read that thousands of acres of pristine road less forest in Colorado is going to be bulldozed in order to remove 170 million tons of coal? This only benefits another large corporation, Arch Coal. We, the people want the Forest Service to remember the multiple use, sustained yield act of 1960. "We need to stop adding to greenhouse gases through coal mining. We should be planting trees to reduce carbon dioxide not destroying them. Stop contributing to species endangerment by cutting forests!!!"

Jeff Ratcliffe CT 06255-2155

"I cannot believe the US Forest Service is short-sighted enough to allow the decimating of our National Forests removing the very thing which can help prevent &/or assist the in reversal of global warming; and just to add insult to injury, remove something, that when utilized, is a major contributor to global warming."

Pat Rathmann ID 83843-2140

Mary Rausch MN 55421-4131

"Please be forward looking for future generations, rather than allowing short-term profiteering of our forests. Look at the huge increase in solar and other renewables, to the point where electrical utilities are trying to bill for non-use! We do not need the coal mined and are hurt by the additional carbon in the air that is not being sequestered into the soil. Please do your part. Keep the coal in the ground and do not desecrate ecosystems for a few wealthy, often FOREIGN, shareholders."

"Wake up."

Cherie Rawlins OR 97520

"Please, once and for all, close the loophole that would allow coal mining on forest land. Arch Coal and others must not be allowed to continue to destroy our land. Worse - coal is not even needed globally. Getting coal to market further degrades our environment - not to mention the burning of it. Please stop this in its well worn tracks. Be courageous for the greater good. Cherie Rawlins A Fort Collins, Co native."

"Is our country in such desperate need that his coal must be mined? I have seen the effects of mining operations in down state Illinois and in Kentucky, the land was left in a poor state, of course much of the mining was done when most of our country used coal to heat their dwellings. Times have changed. We CAN and SHOULD be good stewards of our land. Remember this land is for all generations not just ours. Bob Rayburn U.S. Veteran 1963-1967"

"The only one to see any benefit from this proposed atrocity would be Arch (enemy) Coal, its executives, and its shareholders. The global environment won't benefit -- more greenhouse gasses and increased warming; the

local environment won't benefit -- the destruction of a forest may not be forever but it will be an ugly scar for generations; the local residents may see some "benefit" in the short run but when the coal runs out or becomes uneconomical to mine, its goodbye, good times. No body wins except those who don't care. Close the loophole -- save the forest!"

Wendy Read Wertz IN 47401-4476

"No more polluting, climate warming coal!! The time for this filthy fossil fuel is OVER. Leave it in the

ground where it belongs and turn to a new industry--renewable forms of energy. Stop destroying even more of our once beautiful landscape to sate your greed. Enough!"

Stephanie Reader CA 94024-4028

Chance Reardon CA 90046-4728

"Please look at the big picture here, this is and isn't about these roads being built. What we're not taking into account is a hundred years into the future, three, five hundred years into the future. It's imperative that we see these roads for what they are, and end to open land that is critical to this nation's/planet's future. Please look at how much open space we've consumed already in the name of progress, but this isn't progress, it's irreparable damage. Coal by the way is going the way of the dinosaur, and no, I wouldn't want these roads built for wind or solar either, though that needs to be our future."

Eugenia Redding NM 87507-3291

"Our country's "leaders" must stop caving and being complicit with big corporations who consider nothing more than this quarter's earnings, profits, and dividends for shareholders. I live in New Mexico and witnessed the shocking results of the breach in a holding tank from an old mine in Colorado that loosed millions of gallons of toxic waste into the previously pristine Animas River and affected other water sources downstream. Some things, such as our forests and wild places are irreplaceable and must

be protected, for those of us who live nearby, and for future generations."

"Recently there have been pictures of citizens of China wearing gas masks and walking through black smog. That is what happens when coal is a major fuel pumping noxious fumes into the air. I saw the pictures and thought - Thank God the US has more sense than that. And now I hear that our national forest service, an entity whose purpose is to protect forest lands and the trees living there which pump oxygen into the air as a part of Earth's built-in recycling system, is trying to let coal mines bulldoze the whole place? NO!!!!!! Absolutely NO!!!!!! Did you never read The Lorax by Dr. Seuss? Are you trying to kill our planet? Are you trying to add to asthma and lung problems not just for those of us who already have these problems, but also for millions of children in the future? SAY NO!!!!!!"
