"Please serve the interests of the American people and their natural resources rather than the financial interests of a coal company. Thank you."

Elena Brenna WA 98365-9503

"Please be part of the solution. We've got to do more than turn the corner. We must make a u-turn on putting more carbon into the atmosphere through mining activity and the use of the resulting carbon. On top of that, your agency should be protecting as much pristine forest as possible - the lungs of the planet depend on it."

Joan Brennan KY 40207-3771

"Why does our government continue to subsidize the coal industry when it destroys our environment ?"

John Brennan OR 97212

"I've hike Colorado top to bottom. There's already enough destruction of the forest. Coal is not worth it."

Patricia Brennan RI 02906-1015

"This loophole is BAD from so many perspectives: adding to climate change AND degrading the wilderness environment. It's a Lose/Lose for Americans."

Alan Brenner

"Mining coal is not carbon footprint reduction!"

Mary Brenner PA 17112-9622

"Not only are fossil fuels becoming a thing of the past throughout the world, but I'd rather we did not ruin our forests for smog in China. Thank you for reading my letter."

Lisa Brenskelle TX 77004-2730

"Forests are much more important to humanity than coal. Do not permit coal extraction over pristine forest preservation."

Debbie Brent MD 21045-4495

"we can't continue to ruin the environment, especially for the purpose of producing toxic fossil fuel !"

Rosalind Bresnahan CA 92405-2318

"Coal mining is the dirtiest and most environmentally destructive form of fossil fuel. We should be ending mining, not allowing it on pristine land which should be protected."

Georgia Brewer CA 91401-5228

"Please, protect our natural heritage from coal mining! What will be left after we destroy our forests?"

Melanie Brewer FL 33411-3072

"I'm from Kentucky--I know what coal mining does to the environment--it destroys it! Invest your money in clean energy instead"

Ginger Brewer FL 32506-9542

"Please do not reopen the coal mining loophole in the Colorado Roadless Rule."

Judy Mckinley Brewer MA 01036-9716

"Roadless forest is a special resource, supporting a particularly unique part of the ecological web. Most of the creatures who live there cannot "make do" with fragmented forest. This is a critical natural resource for all of us, but coal is not - and coal can be garnered from many places."

Steven Brewer MO 63119-2649

"Please stop this proposal. Do not let exploitation take place in this and any other roadless area."

Laurie Brewer OH 44281-2252

"Enough is enough. Just please stop with all this destroying of our world!!!"

Christopher Brewer TN 37405-2829

"Please be the "Forest Service" and not the "Roads and Coal Service". Thank you."

Sam Brewton NY 12866-2627

"Very concerned that allowing Arch to exploit the "Roadless" loophole would be another nail in the US coffin. The majority of Americans are simply not in favor of this."

Charles Sr. Brexel GA 30075-1455

"I, along with the following concerned companies, investors, organizations and citizens, oppose the Forest Service proposal to reopen the coal mining loophole in the Colorado Roadless Rule. All of the following supported an extremely strong agreement at the Paris COP21 UN Climate Meeting and supported the aim to keep the global temperature from exceeding an increase of 1.5 degrees Celsius. Reopening the coal mining loophole in the Colorado Roadless Rule is not in keeping with the aim of the COP21 agreement and would not even give us a chance to keep the global temperature from exceeding an increase of 1.5 degrees Celsius. The following concerned companies, investors, organizations and citizens, who all oppose the Forest Service proposal to reopen the coal mining loophole in the Colorado Roadless Rule, are: 1. More than 200,000 US big and small companies (the Ceres 'Climate Declaration' pledge group, the 7/31/15 support letter of 365 businesses for the CPP, the 'We Mean Business' group, the 'American Business Act on Climate' group, the 'Corporate Renewable Energy Buyers' Principles' group, the RE100 group, the American Sustainable Business Council (ASBC), the Green America 'Green Business Network' and more) 2. "Please protect our finite forests. They are a resource that is part of our national ecosystem. Please use the brain that is part of your resource system!! m.brick"

Sally Ann Brickner WI 54937-8158

"Companies, including Arch Coal, ought to cease and desist extracting coal let alone traversing through pristine forests and cutting trees to obtain it. Coal burning contributes more tons of carbon into the air than any fossil fuel. The Colorado Roadless Rule needs to be upheld."

Donna Bridgers FL 33604

"Leave the coal in the ground. GO GREEN."

Marjorie Bridgers NJ 08106-2305

"Coal should not be taken from the ground and forests certainly should not be cut down for it or any other reason."

Joseph Bridy PA 19148-1226

"All coal must stay in the ground to preserve our way of life and protect historic and future climate security."

James Briere CA 91355-2411

"Please start working for The American People. How you can choose Arch coal over us is disturbing. Do your job!!"

CJ Brierly

NJ 08062-3208

"Roadless forests help give nature a break from encroachment and over population."

Adrienne Brietzke AR 72116-4595

"This is CRAZY! You want to take out millions of trees -THE VERY "LUNGS" THAT ABSORB GREENHOUSE GASSES-to accomodate a private company so they can PROFIT FROM OUR LOSS! Not to mention that coal mining needs to stop completely to have any chance to stop current climate warming. Also, coal is OVER. It's been aggressively replaced with green alternatives. If Pres Obama is serious about commitments to climate change made in Paris, THIS MOVE VIOLATES THAT! Be responsible to US-the citizens and taxpayers of America-NOT private corporate interests!!"

Vicki A Brigati MN 55124-6578

"Please leave the forests alone. Nature should not be messed with."

Don Briggs

IN 46360-4652

"We need to keep fossil fuels in the ground, and coal is the worst."

Christopher Briggs MD 20817-5528

"I am appalled that any plan to open mine coal is still on the table when we need to reduce our carbon debt. This is wrong and you should be thinking about your grandchildren and their lives before you go ahead. Just say NO! You know it makes sense for our planet and all out futures"

Jennifer Briggs PA 15221-3201

"Please help the health of our world."

Annette Briggs TX 76039-2534

"I live in Texas and we do NOT need any more coal!!! I also am putting solar panels on my roof-THAT is the type of energy we need to support-CLEAN!!! Please don't cut down our forest for coal!!! Why isn't the USForest Service helping to protect our forests and environment?????"

Cathy Brigham OH 44024-9744

"It is important that the remaining roadless areas of our country remain that way. Allowing private companies to exploit loopholes for their own gain should not be prioritized over the importance of undisturbed habitat."

Leila Bright

ME 04841-2547

"Stop this disgrace!"

Larry Bright

MI 48197-8985

"What's good for Arch Coal is really BAD for all the rest of us - - reject this barbaric, messy practice."

Michael Briley CA 93023-3418

"Stop the permanent degrading of our environment for the sake of plain old Republican greed."

Kimberlee Brillhart

"In the wake of the PAris CLimate Agreements to limit CO2; when we see horrendous photos of pea-soup smog in China; when we know fossil fuels need to stay in the ground to protect the lives of future generations...NO. Do not exploit this loophole. Do not add to the destruction."

Lynne Brimecombe MI 48103-6611

"We need to preserve our wild lands before it's too late."

Julia Brinckloe CA 94037-0317

"I lived many years in Pittsburgh, and I know firsthand what this kind of bulldozing for coal exploration does to the environment. Our precious wild places are NOT LIMITLESS and they are disappearing. Please, please. Say NO to this senseless destruction, once and for all. Profit must NEVER be made at the cost of our home. Thank you."

Joyce Brinegar

NC 27265-3015

"It is time to stop catering to fossil fuel criminals."

Tom Brink

NE 68467-3101

"We are destroying the Earth. It must stop now."

Ken Brinkley OR 97217-7916

"Really ! Coal is not the way to go . Let it go and get with the program of renewable energy !"

William Brinkman WA 98110-1947

"Please protect our beautiful natural treasures."

Kenneth Brinson NY 10603-2828

"Stop being "Corporate TOOLS"!!!!!"

Barbara Britton GA 30907-1219

"WE CAN KEEP WARM OTHER WAYS WITH OUT DESTROYING MORE FOREST, WATERS, WILD LIFE AND AIR POLLUTION...."

Marilyn Britton NH 03458-1811

"We shouldn't be destroying beautiful forests, especially for coal. We need the forests to stay as is, and we need to be investing in cleaner energy sources. Please don't let this happen."

Chandra Brock TX 75150-6880

"I hope you take a step back and clearly understand what is really at hand."

Rev. Judy Brock TX 75034-6560

"Reject the coal mining loophole, PLEASE."

Martin Brockway OR 97015-8648

"there are other and better ways to finance the forest service. this deal is not worth the sacrifice."

Karen Brockwell OK 73127-5512

"Please don't let big coal destroy any more of our forests and streams!"

Rhett Broderick CA 90245-3657 "#N/A"

Michael Broderick TN 37604-5902

"We need more clean energy"

Peter Broderon FL 32312-2207

"Leave the coal in the ground!"

Esther Brodie

"Save our forests environment Planet Covert to clean renewable energies"

Ruth Brodie

CA 94115-1772

"To tear up a forest to mine coal contributes doubly to global warming. It is bad practice in so many ways.

Shame on you."

Stanley Brodsky NM 88042-9518

"The U.S. cannot continue to battle climate change on the world stage, while at the same time allowing huge companies to create the pollution which results in climate change. We have to control our greed for profits so that we may keep our environment clean enough to live in. Secondly, closer to home, we should realize that we are sharing our country with many animal species, and we should not continue to bulldoze their environment, resulting in eliminating animal species which are vital to our continued existence on this planet."

Terri Brodt

IL 61019-9776

"Destruction needs to end, we need to value what few resources they have left standing, and find a way to preserve instead of destruct."

Diane Brody FL 32606-6741

"Climatic change caused by human actions can be slowed down by forests. Forests absorb excess carbon dioxide in our atmosphere. Burning coal creates excess carbon dioxide. Are you part of the problem?"

Michelle Broe CA 95403-8612

"Forest Service : do the right thing - leave the coal in the ground keep our forest wild & free"

Christine Broeske WI 53006-1409

"Let's keep the wild lands wild. Once you open these areas to coal or logging they will be ruined."

Sharon Brogan CA 93304-1326

"Trees are one of the most important things on earth. The more you kill the trees, the less pure oxygen we have to breath. If you want to contribute to mass pollution and making it harder for sensitive people to breath. Lungs

are compromised. And older people die earlier because there is less oxygen for them to breath. I encourage you to take action to stop this awful thing from happening. We and many animals will suffer if this happens. Thank you"

Lori Broger-mackey CA 91325-1510

"Please stop bulldozing pristine forest."

Gisselle Brohan WA 98512-6636

"Please do not allow roads to be Arch Coal to bulldoze forest in Colorado. Please protect our trees on this precious world of ours!"

Benny Brojde WI 53217-6059

"We need to keep coal in the ground and nature thriving for generations of enjoyment of our land."

Jan Bromann OR 97520

"Do not let Arch Coal destroy thousands of acres of pristine forest in Colorado. Leave that dirty fuel in the ground!"

Chris Bromfield FL 33431-6907

"Coal should be the first fossil fuel that the USA eliminates as an energy source. Destroying pristine land, polluting the air, then dealing with the ash slurry...it makes no sense. Stop the madness."

Kevin Bromley TX 76134-4155

"WE DON'T NEED COAL. STOP MINING THE FOSSIL FUEL COAL. COAL MINING DESTROYS THE ENVIRONMENT AND KILLS PEOPLE."

Autumn Brook ME 04287-7656

"Coals manufactured devastations must be banned"

Jack Brooka

WI 53151-8284

"The very last thing that we need is another development of coal. We have all witnessed the destruction of W. Virginia to produce coal that isn't going to be needed in the future."

Jamie Brooke PA 19444-2216

"We must re-evaluate our relationships with the planet. Without her/him/them, we are nothing. Our Earth is precious and magnificent and powerful. Our destruction is oafish and childlike--unthinking of consequences. Here are citizens calling to you to say protect and preserve our forests. Think of the effects before selfishly seeking profit. There is more to life than money, and more to life than destruction. Our damages are impermanent in the grand scheme of life, but destroying forests has a ripple effect in land ecosystems. Think of the homes you propose to invade, and the beings you propose to kill. What is the value of one life in the act of taking another? There is time and patience on our side. We have a right to reflect and question these motives, as well as deny the wishes to enter the loophole. Arch Coal persons are disillusioned. Now is the time to wake up with peace in our hearts."

John Brooks

"Please don't allow the loophole in the Colorado Roadless Rule to make it possible for Arch Coal to bulldoze across pristine roadless forests."

ED Brooks

CA 93436-7915

"Coal mining is and has been killing the environment and the people living near and down stream from strip mining operations for decades. Now in the pristine forest in Colorado? Start investing in renewable energy instead."

Patrick Brooks CA 90403-2823

"Please! Don't allow Arch Coal to add climate pollution to our atmosphere at the expense of wild forest!"

Vicki Brooks CA 91364-3710

"Responsible stewards of our planet and the future generations who will inhabit it, begins with these small steps."

D Brooks FL 33709

"There are other methods to obtain energy: solar, wind, water, recycling waste, etc, We need to stop polluting our Mother Earth. If we stop taking care of her, she will stop taking care of us and we will cause our own extinction. Wise up and do the right thing please!!!"

Theresa Brooks KY 40330-9658

"Leave the forests alone! We need the biodiversity and trees to capture the carbon we have already

released affecting the atmosphere and climate change. It's time for a change!!!"

Devorah Brooks MD 21208-3329

"Reforestation and maintenance of our forests is imperative. Coal mining is not and efforts to preserve an industry that will fade with new energy sources and revitalized job training for those affected by our industrial evolution."

Geoffrey Brooks NV 89523-4883

"We have to stop mining and burning coal now to save the planet for future generations. All coal fired power stations should be closed as soon as possible. Keep all the Carbon in the ground, in the ground! Maybe Arch Coal can be paid to inject CO2 into the ground where it will be permanently captured."

Nancy Brooks VA 23149-2555

"We need to keep & preserve the forest!"

Becky Brookshire NC 28753-6300

"Please reject this mining loophole to the Colorado Roadless Rule. It is not in the best interest of our citizens, environment, and wildlife."

Gary Broom

"Really?! We need more coal do we? And what exactly is the economic case for mining a soon to be outlawed carbon fuel and tearing down virgin forests to do so? You do know your Organization is supposed to be concerned with sustainable Conservation, don't you?"

Sarah S Broomfield KY 40403-1738

"It is time to leave the coal in the ground, especially when pristine forest is at stake."

William Brothers CA 93023-1731

"It's time to phase out coal and protect our outdoor resources as well!"

Susan Brothers OR 97005-3623

"What the hell? Are you for the people and the planet or against us? Don't you have family who will have to live with your decisions??"

Barbara Jo Brothers TX 78209-1303

"We don't have trees to spare--"

Scott Broughton

"I believe in a Creator God. Let's do the right thing and honor Him by protecting His creation."

Barry Brown CA 91364-1923

"Help save our planet!"

Jennifer Brown CA 95521-4978

"How much longer are we going to put corporate profits above the planet's health?!"

Patricia Brown CA 92672-3168

"It would be a travesty to allow Arch Coal to devastate the forest, polluting, killing wild life, ecosystems. We need forests! We don't need coal mining. Please stop killing our planet."

Cynthia Brown CA 92116-2601

"NO, NO, NO, NO!!!! DO NOT REOPEN THE LOOPHOLE IN THE COLORADO ROADLESS RULE! Arch Coal needs to stay out of the area. WHY ON EARTH WOULD WE LET thousands of acres of pristine roadless forest be destroyed for coal that WE DON'T NEED. It would be a rape of OUR precious lands!!!! STOP IT NOW."

Shelley Brown CA 90016-1815

"Please do not allow the obliteration of more forest!!! There is so little left for our children. We need the forests more than the coal, because once the climate is destroyed, it won't matter about coal anymore. Thank you!"

Gillian Brown CA 94403-1247

"please respect the earth"

Candace Brown CA 90265-5070

"Please think twice before undergoing these destructive activities."

S Brown

CA 95959-2157

"Public lands should not be for private profit, especially at the expense of the public paying for the long term environmental destruction (local and global) caused by these corporations. The USDA FS needs to show how this action would actually benefit the American People taking into consideration all economic and environmental "cradle to grave" costs and benefits."

Jan Brown

CA 93651-9778

"STOP IT!!! JUST STOP IT!!! We need all of our forests and NO MORE COAL!! Go Solar, save our planet. GEEZ"

Jennifer Brown CA 92358-9745

"Thank you for considering the public for whom these forests were intended to be protected for."

Angela Brown CA 90016-1317

"The US must make an effort to move away from dirty fossil fuels. We also need to protect trees as they are nature's scrubber of CO2."

Roderick Brown CA 92116-2601

"This is near the end of the year we were supposed to end fossil fuel's. Not make it worse!"

Gary Brown

CA 90212-3723

"We need our forests. With so much energy being provided by the sun and wind we must learn to harvest that energy and not continue to build more new mines."

Malcolm Brown CT 06069-0584

"We need forests much more than we need coal."

Max Brown

GA 30033-2934

"The Roadless Rule is there for a good reason. Another good reason is to keep these lands for our

children and future generations. Please stop allowing the use of a loophole."

Rebecca Brown IL 62374-0047

"Now, and permanently, close the door to this devastation. Nothing on this planet, including humans, can sustain policies that allow it. The cost is too high."

Timothy Brown IN 47459-6040

"Our National Forests are already divided by too many roads. I am opposed to destroying our public land for private gains."

Nelson Brown IN 47562-5303

"Stand up and be the Forest Service, not just another coal company shill.."

Dorry Brown MA 02459-2419

"Please do your part to stop actions that will increase rather than slow climate change. The youth in this country and the world are depending on you."

Scott Brown MT 59901-6122

"In this day and age it shouldn't even be a question how bad a decision like this is for us as a country. We need to stand up and defend our country, the planet and our children from the selfish interests of a few rich people that have taken advantage of us for far too long. We need to ask ourselves how mining this coal would benefit us and when we do that I think we realize it doesn't."

Virjeana Brown MT 59714-4033

"Leave the coal in the ground. The world needs to move to renewable energy NOW!"

Jay Brown

NM 87105-2757

"Why destroy the beauty of our forests. There are other ways."

Julie Brown

NV 89107-2556

"Keep it in the ground!"

Kevin Brown OR 97381-8750

"Keep OUR coal in the ground, and keep these robber barons out of the National Forests and stop exploiting them for profit!"

J. Wesley Brown OR 97222

"This is no time to expand coal mining, especially in wilderness areas that absorb CO2 and produce the oxygen the planet needs if we are to survive. Do not allow this doubly dangerous coal mining to go forward!"

Melissa Brown OR 97292-0822

"We need our forests more than we need more coal."

Michael Brown OR 97487-9416

"We need the trees and the wilderness much more than we need the coal. There are alternatives to coal, but wilderness is irreplaceable. Please do not cut roads through forest to get access to mine coal."

Kenneth Brown PA 17543-9205

"This valuable earth that is our home, has resources that should never be exploited because doing so will undo the many attempts to bring global warming under control. Please act on behalf of the health of the

fragile earth!"

Reggie Brown SC 29385-9776

"Please STOP IT!"

Claire Brown TN 37167-4831

"I HAVE LIVED IN COLORADO AND I DON'T WANT IT TOUCHED LIKE THIS. ANYBODY WITH A BRAIN OUT

THERE? Claire Brown, Smyrna, TN"

Robin Brown TX 76028-6155

"Our earth is in great jeopardy right now and it' inconceivable that anyone would consider carving out a road where trees cover a forest . Coal mines are not the future. Burning coal is ruining our environment and we should be looking toward a future free of it. I live in this world too and I should be able to have a decent earth to live in!"

Deana Brown TX 78059-0555

"Please dont allow any company profit from polluting especially"

Betty Brown TX 76310-0470

"Your job at the forest service is to save our forests. Assisting a company in destroying a forest is not. How many more animals will become endangered from a coal company?"

Kathryn Brown VA 22079-3121

"Please do not allow Arch Coal to profit on the backs of our wild places. Pristine forests are dwindling across the world, and can never be replaced. We do not yet know the impact of destroying the forest, which is more than just a place for wildlife to live. We do know the impact of air and water pollution. Do not allow this to happen."

Alice Brown WA 98230

"Now is the time to develop new, clean sources of energy. Tearing up forest lands to develop coal resources in Colorado or anywhere else can only accelerate CO2 emissions and cause more harm to the earth. The Colorado forest land in question belongs to the people of the United States. It is ours to protect as a clean air resource. No permits for Arch Coal. Thank you. Alice Brown Birch Bay, Washington"

L.W. Brown

WA 98229-7608

"There is less need than ever before for new coal mines - companies are trying to ship it to China, as there is so little US demand: do NOT destroy virgin regions for a low-demand product, esp. one that pays so little to the Treasury..."

Robert Brown WA 98466-6640

"There is no reason (other than money) to destroy a great forest in order to mine coal. Please put a stop to this!"

Diane Brown

WI 53705-2668

"Bad idea for many reasons. Destroying forests is terrible for humanity and nature. Mining and burning coal is toxic for the environment and kills people, plants and animals. Don't let it happen!"

Anna Marie Brown WI 54801-8433

"We cannot continue to damage pristine forests to obtain fossil fuels. We are damaging our environment and causing climate change. Citizens should be able to enjoy the benefits of the forest and not lose that right to make it possible for fossil fuel companies to reap huge profits. Please, don't allow this proposal to be passed; close the loophole one and for all! Please don't allow this to happen. You are there to protect our forests current citizens and also for future generations. Thank you for your consideration."

Regina Brown WV 26288-8607

"I do not want our environment to like the ruins of the an apocalypse! and that's exactly what these mining companies are doing to our planet"

M. M. Brown Henie OR 97535-9719

"No loop holes...including Arch Coal. It is a destructive and climate endangering proposal!!!!"

Patricia Browne IL 60513-1342

"Greed is destroying this beautiful planet. Please stand against Arch Coal from ruining yet another pristine forest. Please do what is right not what is easy. We all pay a huge price for cheap coal."

E. W. Browne NY 14850-4614

"Why permit building roads in the forest just for the monetary benefit of one private company, Arch Coal?"

Charletta Browne WA 98109-5560

"We don't need fossil fuel at the expense of the wildlife that will drastically impacted."

Harry And Jill Brownfield PA 17074-9207

"This proposal stinks to high heaven - it fails on so many levels its really not even worthy of consideration. But typically, Arch Coal - a fossil fuel whore if there ever was one - has found other fossil fuel whores in the Forest Service to lie down with and spread their filth and destruction one step further."

Matthew Browning FL 34695-4907

"Protect our forests for future generations! Do not take bribes from fossil fuel companies."

Victoria Brownlee WV 25262-0036

"Please do not allow any coal company, including Arch Coal, to bulldoze thousands of acres of pristine roadless forests in Colorado by re-opening a loophole. The coal must stay in the ground and the trees must remain untouched. Wild must stay wild."

Sarah Brownrigg NM 87507-2780

"WHAT IS THE MATTER WITH YOU PEOPLE?? WHAT IS IT ABOUT D-E-S-T-R-U-C-T-I-O-N OF OUR PUBLIC LANDS THAT YOU DO NOT UNDERSTAND? STOP THIS MINDLESS DESTRUCTION AND STOP IT NOW!!!!!!!"

Aliaska Brozen

HI 96753-9321

"TOTALLY INSANE. TOTALLY."

Pamela Brubaker

"I urge you to act to protest our forests and our climate, for the wellbeing of all of us!"

Barbara Bruce PA 15905-1135

"We don't need the coal, or the environmental devastation that Arch Coal will surely fail to repair. Colorado should rewrite its Roadless Rule to eliminate this loophole for good!"

Christina Bruce VA 22902-6219

"Please leave the earth undisturbed, we can do better, only if people will listen to the earth....."

"Please stop Arch Coal from bulldozing thousands of acres of pristine roadless forest in Colorado in order to mine more coal. The burning of coal to produce energy is being replaced by much cheaper and less polluting natural gas as well as alternative energy mechanisms. In short, this coal is not required to fuel our economy and, given the tons of carbon dioxide that will be produced by burning it, is better off being left in the ground. Blocking this plan will also protect the forests around the proposed site as well as the animals that live within it. We are losing our wildlife heritage in order to burn a dirty energy source we don't need. Throw out the loophole that would make this action possible. Its a matter of common sense."

"It Seems, adding insult to injury is to be the hallmark of all governmental agencies working at the behest of private corporations. Be it established that carbon burning fuels are a nonstarter in as much as the known effects attributed such as pollution to health and environmental, should in themselves call to quit. Instead to create the otherwise insidious enough "roadways" to facilitate an physically ecologically disasterous act of callus disregard to natural systems, after all mature forests do clean the air. What kind of science are you following? Where is the public benefit? Let me guess that the giveaway is millions of dollars for pennies on the hundreds. Short term gains are running up against the last of the practical timeline for making timely changes to global energy sourcing solutions. This is back sliding at tremendous cost."

"What caused the forest Service to re open this loophole for a company with such a poor record of safety and pollution? Since the current trend for managers of universities and pension funds is to dump coal from their portfolios, because coal is dying, just like whale oil did. Do not let a vast part of American forest be destroyed for a quick profit and leave the American taxpayer with the clean up bill. Deny this attempt to re open the loophole."

"PLEASE do not reopen a loophole that would let Arch Coal bulldoze through roadless forests in Colorado! WE need forests to help with climate change by sequestering carbon. We do not need the opposite: more coal mined and released into the atmosphere. I visited Costa Rica last year. They have

reforested their entire country -- giving special incentives for NOT CUTTING pristine forests. WE CAN DO IT TOO! They had cut forests for cattle production -- to fuel the our U.S. fast-food burgers. Having seen the folly, they have encouraged the reverse -- instead of only 30% forest cover a couple of decades ago, the now have 60% forest cover. WHY can't we do the same as that tiny little country? Please tell the Forest Service that it works for ALL the people of the United States, NOT one big corporation called Arch Coal -- no matter what "benefits" they tempt the Forest Service with. Leave our natural forests alone! They are part of our long-term salvation. Even CHINA has started replanting forests. For heavens sake, we can do better than that huge dictatorship. "Coal is OVER!!! Put your time and investment into wind and solar power and there will be enough power--and even profit--for everyone. It is immoral to destroy our forests, and therefore our atmosphere. It is also immoral to ask workers to mine the coal and risk their lives and health. My father was a coal miner for 52 years, suffered from black lung disease, was injured and almost lost his life twice. Sure, equipment and mining methods have improved since those bad old days--but mining is STILL one of the most dangerous jobs in USA and totally unnecessary as far as providing the means for power! I feel like I'm shouting into the wind with this appeal--but thinking of my Dad and many of his coworkers and friends who didn't "make it out of the pit", I will keep shouting. "This is wrong on so many levels, first being profiteering by the greedy corporate interests of the few at the expense of the larger taxpaying public. These are unreplacable pristine wilderness lands and should be left as such. Another backward and wrong initiative is this literal raping of the land to extract the dirtiest of fossil fuels. Aren't the gov't agencies responsible for stewardship of our resources and health paying attention the global climate crisis? Time to stop poisoning our very home with dirty the dirty fossil fuels of yesterday and move toward sustainable, clean, renewable energy resources. It is the inevitable future. I strongly urge the Forest Service to do its duty, protect forests and wildlands, and deny Arch Coal any and all access to Colorado's coal resources. Regards, --TC"

"There are so many renewable energy alternatives out there! Please don't destroy our forests in Colorado. We need this wilderness habitat for important species and to keep our ecosystem in balance. We don't NEED this coal. There are alternatives to energy production and we don't need to destroy forests that produce oxygen and help our ozone layer to do so. You can make money in other investments/projects. PLEASE don't destroy these forests!!! PLEASE!"

"I am writing to urge you not to use our taxes to assist in any way or allow Arch Coal to use public lands to mine for coal. There is no end to the irreversible environmental degradation to the land, water etc in addition to the negative impact and loss of life for its wild inhabitants. Please prioritize the main mission of your agency, to care for and protect these "Public" Lands for future generations of the wild inhabitants and the natural resources (clean air, clean water and biodiversity) that in the end we all rely on for sustaining life on this planet. It just doesn't make sense to lose all of the above for a product that degrades in its extraction process and in its final use for a fuel source that will have an additional negative impact on our environment as a whole. Thank you for reading my letter."

Frank Cassianna OR 97458-1523

"No Roadless Bulldozing Loophole for Arch Coal Dear U.S. Forest Service, I oppose the Forest Service proposal to reopen the coal mining loophole in the Colorado Roadless Rule. Re-opening the loophole will benefit one company--Arch Coal--while paving the way for mining more than 170 million tons of dirty coal. This

could add 130 million tons of carbon dioxide pollution into the atmosphere and cause as much as \$13 billion in damage to the world's economy and environment. The climate costs of this proposal are simply too high. The loophole will also set the stage for bulldozing up to 65 miles of road on 30 square miles of roadless forest, degrading habitat for black bear, elk, goshawk, lynx and cutthroat trout. Valued recreation and hunting areas used by the public will be scarred for years. President Obama and climate scientists agree that if we want to halt the worst potential damage from climate change, we must keep some of the world's known fossil fuel reserves in the ground. The Forest Service should draw the line here, where mining coal will spew huge amounts of methane and destroy wild forest. Please keep the Colorado Roadless Rule as it is. Reject the coal mining loophole to the Colorado Roadless Rule."

With all the forests and trees that are being cut down, more and more children and adults are having difficulty breathing, not to mention our animals. The pollution that coal mining gives off is unforgiveable and it makes no sense that so many people will die next year and every year after that due to lung and other diseases and all so one company can profit.

What has happened to America the Beautiful with good for all. Dying from lung disease is not good for all. Pollution of any kind is not good for all. The benefits of coal certainly don't out weight the no. of people sick & dying around the world. Our trees are necessary and far far to many have already been destroyed because of GREED, just like this coal company. With all the climate disasters taking place around the world at present because of pollution, re-opening the loophole could add 130 MILLION TONS of carbon dioxide pollution into the atmosphere and cause as much as \$13 BILLION in damage to the world's economy and environment. The costs are just not worth it. It would also degrad the habitat for bear, goshawk, lynz, elk, trout and so many more animals. Public Hunting & recreation areas will be ruined for yrs. Leanne Chism CA 95203-2323

"As we know Massey got off with a misdemeanor, quietly, when most are concerned with terrorism and Christmas. God, such pity I feel for the families whose loved ones did not see justice for this criminal neglect...and to be so quickly forgotten. For 30 years I have heard the increase of train whistles crossing through my hometown main street in Nebraska, longer and longer waits... for the train gate to lift. What am I watching? Coal, and more coal, and longer trains of more coal. Yes, from Colorado. This loophole is another tragedy that needs to be reflected on. Like the lives of the coal miners laboring under negligent conditions when you cut a path through the roadless rule, the forest will never be the same, the forest will shrink, the number and length of trains going through Kearney, Nebraska will increase, and coal will continue to create issues that likewise may not be reversible climate-wise. Other more viable energy solutions will likewise shrink, more children and vulnerable adults will have tubes put in their mouths sucking particulate out of sensitive lungs. The rest of us will sit in front of the trains wondering WHY didn't the US Forest Service see the handwriting on the wall, the smog on the fruit of our lives?

Please...don't do this to the forest, and to us."

"In 2011 Rep. Scott Tipton of Colorado Questioned Harris Sherman of USDA on the Forest Service's Colorado Roadless Rule. Rep. Tipton's concern at that time was that there were no leases allowing timber companies to harvest dead and diseased trees that would supply lumber mills in the region, including the third congressional district. Any such leases would have violated the Colorado Roadless Rule, and since that rule is under discussion again in regard to Arch Coal's proposed coal mining in the national forests I infer that no such leases were granted. It astounds me that coal mining would be discussed where even harvesting of dead and diseased trees is not permitted. Coal mining requires not only the building of roads but assures devastation of the forest, at a time when we want to phase out fossil fuels entirely. It's utterly absurd. Environmental scientists have argued for a long time, from observation of damage to forests of the Amazon, that the surest way to destroy a forest is to build roads into it. Please deny mining interests any access to national forests, and preserve the Colorado Roadless Rule."

"It is so warm here in the Midwest that it feels like we are on another planet already. We can get our energy in a much better way than using coal. People in China cannot even breathe right now because of

their air pollution. Is this also the direction we are heading here? It is time people in position to make a difference say "No More" to irresponsible destruction of the planet. Arch Coal needs to be stopped for all of us and our children. We need trees now more than ever! We need to stop contributing to the climate change that is taking place much more rapidly than anyone ever dreamed would happen--stopping Arch Coal would be a responsible start! Andrea Coffey, Ed.D."
