"We already have safe, clean power sources. Leave it in the ground. Our forests are worth more than your coal."

Daniel Garske CA 90731-6419

"Do Not allow destruction of OUR National Forest for coal. Didn't you hear that we are trying to reduce the amount of DAMAGE we are doing to the environment??"

Daniel Gartner AZ 85755-7199

"We need to save what little remains of America's wilderness for our children and grandchildren."

Katie Garton NY 10001-2332

"Please do not allow Arch Coal to mine in thousands of acres of pristine roadless forest in Colorado!!! We need to protect our remaining roadless wilderness and we need to keep fossil fuels in the ground to help slow climate change."

Cyndy Gartside AZ 85018-5711

"We need as much pristine wilderness as we can possibly keep. Please do not allow Arch Coal to bulldoze roadless forests. A company should not be allowed to profit at the expense and degradation of OUR forests."

Esther Garvett FL 33186-3033

"Why would ANYONE destroy pristine forests for coal? This is unacceptable and should NEVER happen."

Marjorie Garvey

"To even consider this allowing of Arch Coal to enter these or OR ANY of 'pristine roadless forests in Colorado' OR ANYWHERE is beyond despicable and a complete & shame-full travesty!! Our family has always had respect for Forest Service. We considered the Forest Service a positive and Responsible agency for protecting the our forests and environmental issues concerning their well-BEing :NOT only in generations past . With the ever increasing 'sell-outs' by Forest Service ...what will loss of protection mean for future generations ! VOTE NO WAY!!! STOP paving way for Arch Coal to come in where it does NOT belong . MAY YOU REGAIN YOUR PRESENCE TO FOREST SERVICE COMMITMENT =PAVE WAY FOR THE CONTINUANCE OF NATURE'S PURE GIFT TO US & FUTURE GENERATIONS!"

Daniel Garveydanielg VA 22181

"This is degradation at its worst--it needs to stop!"

Chris Garwood MD 21212-2019

"There are other alternatives such as clean energy rather than raping the land"

Helen Garza TX 78216-6300

"We need to preserve our wildlife. Stop destroying our beautiful forests. This is a clear danger to many species!!"

George Gaskill

FL 32926-5756

"Atmospheric pollutants must be kept in the ground if our planet is to have any chance at survival!"

Christina Gasman WA 98502-9584

"we have to protect our forests and the animals that need homes to live in without people or harm"

Suzanne Gaspar IL 60099-3045

"The only way to preserve what's left of our world is to stop attacks on it such as bulldozing pristine forests."

Lawrence Gaspar WA 98584-7027

"Arch Coal - This organization's leader has been convicted in a court. America does not need any more coal, as COMPARED TO GREEN ENERGY OR EVEN NATURAL GAS"

Liz Gaspar  
WA 98584-7027

"First of all, I see no point in opening any areas to new coal mines. Secondly, I've seen what coal mining does to communities...and ecologies. No!"

Carol Gass

"Please stop this destructive proposal! We need to save the forests and coal is NOT in the future of our world's interest. Of all organizations the Forest Service should know better!!!"

Barbara Gaston TX 78746-7230

"Please do not allow this type of action in Colorado, which will devastate wilderness areas, destroy wildlife habitat, and promote the dirty energy of coal which will promote the devastating effects of climate change. No! No! No! Mining in these areas will further pollute precious water supplies and create jobs that will drain our health care system due to the astronomical rate of injury associated with coal mining. Thank you. Barbara Gaston, RN"

Kelly Gates  
ID 83338-1644

"Coal is not the way to the future, especially at the cost of our forests."

Joanne Gates NH 03048-4623

"Coal is a dirty fuel and shouldn't even be under consideration to mine."

John Gau  
MA 01606-1183

"I can't believe with what science tells us that the forest service would consider allowing Arch coal to mine roadless forest in Colorado."

Valerie Gaudio OH 44022-2811

"Please CANCEL ALL 65 illegally issued oil & gas leases in the White River National Forest. We MUST protect and preserve these pristine, roadless forests in Colorado!"

Monique Gaudry CA 90065-3234

"Enough rape of our remaining pristine forests!"

Violet B. Gautesen Krukonis VT 05452-3780

"Coal should be left under the ground to serve as support structure for our precious earth which needs

every tree to keep the earth healthy."

Linda Gauthier MN 55430-3157

"Do not allow this to happen. It is only for the profits of Arch Coal and not in any way for the common good."

Greg Gavin FL 33772

"Thank you for reading my letter. Before its too late let's us try to leave something that those who follow will thank us for not curse us for...."

Belle Gayer  
NY 11021-3239

"ENOUGH with the coal!! It's time to move on and use only wind, air and sun!!"

Anne Gayler NY 10950-2028

"We don't need more dirty energy....ditch coal and go solar/wind/geothermal/tidal...there are so many other options."

Linda Gazzola NY 10465-3550

"STOP COAL MINING ON ROADLESS FORESTS!!!!"

Robert Gebert PA 18013-5502

"Reopening this loophole in the Colorado Roadless Rule is simply ludicrous. It is counter to all that should be done for the future health of the environment."

Gertrude Gebin CA 94015-4726

"It is incumbent upon the Forest Service to protect our wild lands."

Cynthia Gecas CA 94611-3212

"Coal. Why? We are surely evolved enough in every way to no longer need to mine for coal. I know it. You know it. Please don't destroy that which can never be replaced for this obsolete item---especially for money. Money is practically a hologram...pristine forests are real and vital to all of life."

Paul Gedo  
MD 20850-2125

"Please cease this irresponsible practice."

Edgar Gehlert NY 12538-2036

"Coal mining must end- we can not survive the carbon and ash pit dumps related to coal usage."

Judy Gehrig

NC 27707-9501

"Coal mining is bad enough, but bulldozing beautiful forest lands? Please don't!"

Marcia Geiger WI 53597-9112

"Coal versus CO forest with all its' beauty and wildlife. Gee, pollution vs. everything that I like. No contest, stop Arch Coal"

Donna Gelder WA 98926-9462

"With solar and wind technology, we just don't need coal mining to be done. Please protect our roadless

forests."

Alexa Gelfenbaum CA 94025-1638

"Trees are one of our best chances in the fight against climate change while coal mines are one of the culprits.

Please help save these life forces"

Kate Gelhard MD 21776-8226

"Please do the right thing and do not allow these beautiful forests to be bulldozed."

Robert Gelhaus NY 11801-5826

"It's the 21st century. We shouldn't be mining coal at all. We know better!!"

Lois Geller NY 11214

"This is important, once the damage is done, you can't go back in time if/when you want to repair the damages."

Marybelle Gemell NY 12561-3321

"We don't need more coal, but we do need more forests."

Jeff Gemutliche CA 96003-1980

"Coal use for energy production makes no sense at all with the technologies we have today---actually it's insane !"

Elisabeth Genaux AK 99801-8317

"This is a recipe for an environmental disaster! Bulldozing trees to mine for coal??? No, no, no. Keep the trees upright and the coal in the ground."

Derek Gendvil NV 89117-5744

"Well, I hope we need to tell Arch Coal that they need to demand that they don't open this loophole to continue coal mining by their forests, & that's so unfair. Hopefully Earthjustice needs to do whatever they can to stop this from happening, so that the wilderness itself doesn't get destroyed. We need to put Arch Coal to justice & that the President does whatever he can to stop the loopholes in the roadless areas of Colorado."

Marshalle Genevieve CA 93546-5005

"Please protect our forests."

Mike D Genovese NC 28658-8872

"We must put protection of the environment ahead of the profit's for the coal industry!"

Allison Gentile NY 11249-2056

"We have to stop ruining our pristine forests by digging up coal there, and we have to stop ruining the air we breath by burning that coal. We can and must transition to clean energy now. Stop the all-around destruction caused by coal mining."

Donald Gentz TX 75044-4555

"Ecological damage in the name of more pollution and corporate profits--this should be a no-brainer.

Please don't let this happen."

Faye George MA 02324-1460

"The preservation of our forests is urgent if we are to control the deadly advance of Climate Change on this planet. Our trees--forests--are in the first line of defense in cleaning the air of the CO2s that are threatening life on Earth."

William Georges CA 92867-1902

"The best Climate Scientists in the US (and the world) have definitive proof that carbon concentrations over 350 parts per million in our atmosphere will do long term harm to life on this planet. There is a lag time between carbon in the atmosphere and its negative consequences. Carbon levels are already over 400 parts per million, and as a result, the PH levels of the oceans are changing. The oceans have already become more acidic and hundreds of species are dying off. This threatens the entire food chain of all sea life! If you take out a

foundation level food source, it affects every species higher in the food chain.!

Soon, the fish we eat for food will become more and more scarce - even disappear completely. This chain of events all begins with high carbon levels in our atmosphere-and I haven't even begin to discuss the issues of Global Warming!!! Keep the coal in the ground!! We have effective alternative sources of energy!"

David Gephard CT 06409-1054

"I can't believe that the Forest Service is actually considering to allow a business that wants to make money by clearing the people's forest to mine coal. Any reason to clear the forest is wrong but to mine coal, an extremely dirty form of energy, should be a crime. This is the people's forest & make money by destroying our land for a dirty energy. The trees in that roadless forest help clean the air which will be destroyed if Arch Coal were allowed to mine coal there."

Fabiano Gerard AK 31200

"ARR-TER LES MINES DE CHARBON SUR ROADLESS FOR-TS"

Ira Gerard-di Benedetto IL 60177-3049

"Our park, forests and nature preserves should not be exploited by the coal mining business"

Midge Gerbich OH 43431-1339

"Thank you for taking the time to read this, and hear our concerns. The Public needs its forests, and needs them intact so please help us keep them that way! Thank you again."

Steve Gerdes

"Please leave the coal in the ground and the trees on top! The planet (and all of us, even you,) wins doubly!"

Elizabeth B. Gerlach MA 02461-1132

"The Forest Service must NOT allow Arch Coal access to coal in roadless forests in Colorado. The bulldozed roads degrade the wildlife environment and any coal mined will add millions of tons of air pollution to our atmosphere. PLEASE DO NOT ALLOW IT!"

Brianna Gerondale MI 49301-8315

"Please stop the release of more fossil fuels that will pollute our environment and speed up global warming."

Paula Geroux CA 95470-6130

"Solar and Wind now!"

Stacy Gerrard NC 28115-3123

"It's time to stand up for Mother Earth and all of her inhabitants. Not only would this ruthlessly destroy beautiful forests, it'll displace millions of innocent animals. Stop this madness. It's got to start somewhere. Let it be you."

Janet Gerske IL 60640-6553

"please leave the coal in the ground ... it is everyone's responsibility to protect our environment ... coal companies need a new line of work ... maybe building wind turbines ....."

Aviva Gersovitch PA 15132-4717

"Please don't use legal loopholes to capitalize off of environmental destruction. In the end, who're you really harming? Yourself and the people you care about."

Nancy Gertler NY 11021-4006

"Please, don't bulldoze the forests and kill the animals and trees and plants!!!"

Kathleen Gessaman MT 59404-1263

"No more Loop-Holes for Arch Coal! Save our forests from mining."

David Getchell CA 93711-1759

"How does a loophole like this even exist?! They are killing thousand of trees to mine the dirtiest fossil fuel there is so they can sell it to energy companies who will pollute our air with it. Can you folks at the USFS please help out by NOT reopening this loophole?"

Susan Getejanc OH 44130-4250

"Please quit destroying our one and only home"

Kathleen Gettens OH 44116-2379

"This is insane!! This country needs forests to take in CO2 not coal to produce more greenhouse gases."

Jessica Getz

WA 98136-2674

"Please conserve this roadless Forest for wildlife habitat. recreation and hunting."

Robert Geyer CA 94118-3975

"There are TOO MANY coal mines and NOT ENOUGH roadless forests! Please help save the pristine forests that still exist and cannot be replaced. Thanks!"

Judith Ggeorge CA 92201-7498

"Please do not allow more destruction of our natural environment. Help protect it for all of us, not a few."

Anita Ghazali

"No! No!"  
Bonnie Ghent

TN 37923-1930

"It's disgraceful how we are tearing down forests to get to coal which is a dirty fuel source. We need to put our efforts into clean fuels and stop the destruction of this planet."

Don Ghidoni MO 64117-1905

"This just isn't the way America should be going. Especially in view of the Paris Climate Talks. Really bad timing. It makes look like a bunch of Hippocrates. Sand behind your President and the rest of us please. Thank you in advance."

Viola Ghosh

IL 60070-2140

"I do not want any more forests to be destroyed and wild animals' habitats wiped out for the short- sighted profits of a corporation."

John Giacobbe OH 43017-9774

"The Forest Service should not allow Arch Coal to reap profits while adding huge amounts of climate pollution to our atmosphere, all at the expense of wild, roadless forest!"

Robet Giambruno

"Let 's get on the highway for renewable power and cruise down the never ending road, instead of polluting power which is a dead end.cul-de-sac."

Vanessa Giampaoli

"I strongly oppose the reopening of the coal mining loophole. The pollution of methane gases is too destructive and costly to us all."

Patricia Giannakis MD 21113-1043

"We need to STOP disregarding the harm that we continue to do to our natural resources and our environment."

Antonietta Giarda 20133

"Basta con le miniere di carbone"

James Gibbel PA 17543-8776

"Please stop bulldozing the beautiful forests of Colorado for a mine coal. Preserve these forests. Thank you, James Gibbel"

Sara Gibson

AZ 86001-0955

"There is only one chance here, please take care of our nice places!"

Claudia Gibson CA 94930-2105

"In case you haven't noticed, COAL IS OVER! #keepitintheground. No special deals for the most polluting industry on earth. Between divestment, climate talks and Eco destruction you shouldn't even consider this heinous act. Preserve, conserve, protect and defend. Don't give our heritage away for private corporate Short term profits. Don't bulldoze one inch for robber barons to steal our last bits of wild beauty. It's insane in the face of climate change. And a grasp to far for private interests that will quickly pollute all it touches!"

Terry Gibson OR 97267-6511

"It is not in the national interest to mine coal from pristine forest lands. We need forests much more

than we need to burn coal for energy that can be generated safely in many other ways. Please keep our coal in the ground, not in our air."

Diane Gibson PA 15217-2461

"Preserve the forests!"

Lena Gibson WA 98406-6406

"No more coal mining! There are things more important than greed-- like quality of life and the health of the environment. the Forest Service needs to protect the forests, not exploit them."

Suzan Giesau WI 54115 2552

"I would like to help in some small way to improve the quality of our planet, ie our lives"

Susan Giesel OH 45245

"Please, Forest Service, no more destruction of our wonderful, diminishing forests. Renewable energy is the future - coal is the past."

Daniel Giesy VA 23508-2805

"Transforming sequestered carbon into atmospheric carbon dioxide AND destroying pristine wilderness. A

double barreled ecological disaster. STOP IT!"

Theo Giesy  
VA 23508-2805

"We can not jeopardize the climate, ruin wilderness area, threaten wildlife all for the profit of one coal mining company. The coal must stay in the ground, and the roadless area must remain roadless. Our public lands are for the good of all not for profit for a few."

Carey Giffen MI 49024-5799

"The dirty energy from coal is NOT worth giving up pristine, roadless forest lands. Please preserve our forests!"  
Peter Giffin

OR 97520-1125

"this is an area that attracts tourist and recreationsts all year . It includes inportant habitat for many species that attract people to rhis area . My family is from this area . People do not come here to see coal trains to see ruined landscapes or fish ruined streams . Say no to these private interests . No profits for one company at the expense of the public good , especially not for a dirty reasorce . This is Colorado not Kentucky or Tennessee ... Deny this exception . Serve the people and the forest , not one greedy destructive company ."

Susan Gifford MT 59105-0695

"We the people just don't want coal power, coal pollution, and nature devestation in our state (Colorado), in our country any longer. Coal has seen it's time! Colorado has always been known for it's untainted beauty, clean air and pristine waters. We want it back. No compromise. Our eyes have been opened, and "NO", we don't want filthy dirty power in our state of Colorado. We want clean solar, wind and free energy sources "NOW". We don't want filthy dirty energy in America. We don't want filthy dirty disease causing energy sources unleashed anymore. Start reeducating people for clean energy jobs now. The time has come. LISTEN to US!"

Martha Gifford

NY 11201-2341

"Closing the loophole was the right decision. There is no good and substantial reason to re-evaluate that decision."

Stephanie Gifford VA 24523-6165

"It is unaccessible, ie hidden underground, blocked by trees for a reason. To keep it where it is, it is a challenge for humanity to find alternate energy sources. Accept the challenge."

Michele Giguerecox CA 93657-9737

"After all the tress have been cut down How will we get air to breathe Really..?"

John Gilbert CA 95126-2156

"It's far beyond the time when we should be moving past coal and oil as energy sources. Stop the despoiling of our forest lands, etc."

Tom Gilbert

ME 04086-1923

"This loophole would set a dangerous precedent"

Dorothy Gilbert NC 27713-9146

"Stop destroying the natural beauty of our planet!"

Laurie Gilbert TN 37187-5312

"With the serious concerns about climate issues it makes no sense to destroy the forrested ares. Please prevent Arch Coal from destroying resources that we need for our health and the health of this planet."

Pamela Gilbert UT 84720-3549

"? 294.12 Prohibition on road construction and road reconstruction in inventoried roadless areas. (a) A road may not be constructed or reconstructed in inventoried roadless areas of the National Forest System, except as provided in paragraph (b) of this section. ? 294.13 Prohibition on timber cutting, sale, or removal in inventoried roadless areas. (a) Timber may not be cut, sold, or removed in inventoried roadless areas of the National Forest System, except as provided in paragraph (b) of this section."

Tracy Gilbert UT 84105-2653

"We need to preserve out precious wilderness!"

Karen Gilbride

"Stop now!"

Alaina Gilchrist PA 15217-1329

"Why not switch over to wind and solar power? There is no need to continue mining for coal anywhere, let alone in our forests."

Peggy Gildersleeve NE 68355-1540

"We don't need coal anymore. WE need to leave it in the ground. We have ruined enough of our land for

mining and greed."

Cynthia Giler MD 21122-4711

"Don't reopen this loophole now. We're making progress on cleaning up the atmosphere and stopping

the destruction of the environment and habitat. Don't go in the opposite direction. This is nothing but destruction for profit."

Peggy Gilges VA 22901-7807

"The Forest Service should be protecting the Roadless Rule. It's madness to destroy habitat recklessly in an era of mass species extinction, and to accelerate pollution of the atmosphere with carbon emissions in a time of rapid and dangerous global climate change."

Julie Gilkinson MN 55901-2348

"I have always been so proud of our American heritage which has preserved wild lands. It is so wonderful to have National forests and parks where we can enjoy nature. We can't let these areas be eroded and destroyed!"

Mariea Gill

OR 97501-3009

"This is a no-brainer! STOP COAL MINING ON ROADLESS FORESTS!"

Lfj Gill

RI 02833-1151

"No need for this. And a definite need AGAINST it."

David And Helen Gill VA 22151-3316

"Why should a commercial interest be allowed to trump the public interest with respect to keeping alive and undamaged these environmentally important forests? Smells like quid pro quo."

Linda Gillaspy NV 89506-9717

"Our future depends on our actions today. I do not think you realize the consequences our planet will experience, unless we eliminate the use of fossil fuels. The longer we delay, the larger the consequences. We must all participate to ensure the future of our children."

Abigail Gillespie NY 10023-6257

"Please do all you possibly can to protect our forests and environment. We need to diminish our coal use, augment our alternative energy production and protect the earth. Sincerely, Abigail Gillespie"

Jenny Gillespie TN 37664-2154

"It's past time to consider the lives of our grandchildren and our legacy in creating the world left for them."

Clayton Gillespie VA 22181-3217

"Running existing coal mines using their existing footprint is one thing, new coal mines with a footprint that decimates pristine forest is another. I am strongly opposed to opening new coal mines in pristine forest areas."

Jeanne Gillette CA 94939-1435

"I thought that the Forest Service existed to protect our forests as a natural resource for all Americans and for the American ecosystem. Coal mining does not fit into this picture. It smells like someone is being bribed by the coal industry to sell out our heritage for personal gain."

Jane Gilley

TX 78737-4000

"Who came up with this stupid idea to destroy our forests?? Dumb,dumb!!"

Theora Gilliam MA 01060-4020

"stop the madness"

Laurel Gilligan MD 21718

"Please do not allow Arch Coal to expand and destroy a pristine area."

Ainslie Gilligan VT 05301-6220

"I find this proposal utterly shameless and degrading, both in respect to the habitat to be ruined and to the principles to be shattered. Please wake up. You are sabotaging your own roles as public servants."

Mary Ann Gillis MI 48428

"You are a complete and utter fool if you think there is any benefit to letting your payola friends at Arch Coal will ever clean up their mess. they won't do it as they go and they certainly won't do it after they have virtually stolen the American people's natural resources for their own gain. You give our resources to the highest bidder to put money in YOUR pockets. You are just as bad as the greedy companies that exploit our resources. You don't even get fair market value for the coal. If you did that they wouldn't dig it up. What happen to this clean air "mandate" for coal plants. You are an ass. Two-faced, back- stabbing ass."

Mark Gillono IL 60503-7322

"The human appetite for animal flesh is a driving force behind virtually every major category of environmental damage now threatening the human future - deforestation, erosion, fresh water scarcity, air and water pollution, climate change, biodiversity loss, social injustice, the destabilization of communities and the spread of disease." -- The World Watch Institute <http://www.cowspiracy.com/facts/>

Mike Gilman AZ 85028-3627

"There is no need to mine dirty coal from pristine Colorado forests. Has nobody heard that coal is being replaced by cleaner-burning fuels for the planet's sake?"

Kathie Gilmore FL 33993-7019

"Leave our forests be."

Cathi Gilmore MA 02468-2005

"Please save our land and the many wildlife species which depend upon our land."

James Gilmore OH 43211-4100

"Stop trashing the planet. Start putting efforts towards renewable resources."

Arthur Gilroy NJ 07885-2105

"Please leave the coal in the ground and subsidize solar and wind sources."

Jonathan Gilson

"This proposal represents a clear picture of dying industry's incredible ability to acknowledge their own demise. Coal use to generate energy is already in steep decline. Coal companies are either shrinking or going bankrupt. We need to investigate how these proposals are gestated."

Lawrence Gimbel CA 95954-9580

"I can not understand why, especially with the talks going on in Paris, the Forest Service is even considering adding 170 million tons of dirty coal to our environment. Coal causes health problems. It contributes to climate change. Worse, the mining of this coal will permanently scar what little we have left of our natural environment. It should not be the job of the Forest Service to enrich the pockets of Arch Coal at the expense of the people."

J.R. Gimblet

TX 75060-3272

"Camping in wilderness areas in Colorado were some of the greatest experiences of my youth. It is unimaginable that future generations will not have those experiences. Not only that, but the mined coal would be another nail in the coffin of the human race and the other species with which we share the Earth. No amount of profit for a commercial company is worth the loses our world would experience with this proposed mining."

Germain Giner IL 60640-1021

"Coal is bad enough without it coming at the additional cost of wild forest."

Patricia Gingrich AL 35043-8191

"Bulldozing thousands of acres of forests to mine millions of tons of dirty coal is irresponsible. Our wildlands should be protected from this kind of invasion!"

Carol Ginn

"Crazy and shameful!!!"

Darren Ginn GA 30309-1096

"Stop allowing the destruction of our planet."

Mel Ginsberg OR 97520-3034

"We must stop using coal and start protecting our environment."

Janice Gintzler IL 60445-4125

"Roadless forests are a gift from God. Please keep them that way. Preserve the creatures, too, that live in the forests. Not each part of God's green Earth should have a price tag on it."

Maria Giovino MA 01775-2132

"stop destroying the forests and destroying the future of our planet"

Julian Giraldo FL 34221-4903

"Please stop senseless destruction of our forests ."

Dennis Girard FL 34223-3844

"Enough is Enough! Coal mining has torn the tops off mountains and made deserts of farm and forest land. Don't let them use the Forrest Service as a door to more disruptive mining! Keep Arch Coal out of the forest!"

Eliot Girsang MD 20732-3194

"Our forests and woodland need to be protected, not bulldozed; save the forests!"

Rachael Girshcik CT 06247-0022

"STOP DESTRUCTION OF THE LITTLE FOREST WE HAVE LEFT ON THIS PLANET"

Brenda Gitter TX 78731-3741

"Lets not build this and for once look ahead to the future. Coal is an antiquated fuel source which destroys our air and water while this road will destroy wildlife habitat."

Carrie Givens CA 93117-1822

"Wake up to the new century, it is time for clean energy, not the old ways of filthy ,dirty energy like coal."

David Givers MN 56560-2631

"The just completed Paris Agreement (COP21) and the science of our fossil fuels CO2 emissions means that we must cancel call mining on public lands. This program has been a shame an illegal, allowing coal companies to lease coal in non competitive bid rigging collusion."

Terri Giviens RI 02886-2021

"Mining for coal in forests is bad for the earth and people."

P Givins

CA 95521-5303

"Trees matter more than coal at this moment in time. Wake up to the reality of now. Sheesh."

Shanen Givone MO 64804-3041

"Um...Here's a heads up. American's want to prevent coal burning, coal biofuels, and all things harmful to health. Get with the program and go Green. Only the 1% wants harmful toxins for fuel and energy...but that's only to line their pockets. Wow."

Helen Gjessing VT 05482-7573

"For the sake of humans and wildlife, leave the forest for future generations to enjoy. Leave the coal in the ground."

M Gladis CA 95616

"Leave coal in the ground to protect the earth for all of humanity and all other creatures and plants"

David Gladstone WA 98291-0803

"My wife and I say: NO LOOPHOLE FOR ARCH COAL!"

Susan Glait

VA 23451-3423

"Since coal is dirty and a nonrenewable resource, it's high time other sources were used for energy."

Patricia Glander MD 20902-4041

"Please help."

Nina Glasgow TX 78733-3109

"Let's start being mindful of climate change which starts with extracting fossil fuels including coal from a forest. Shame on Arch Coal."

Frank Glass

OR 97321-1336

"It strikes me as a stunningly poor idea to bulldoze Colorado forests to extract coal. Who benefits? Not the Treasury, which sells coal for a song. Not future generations, who will lose both the forest and its inhabitants, receiving instead the CO2 of burnt fossils. Since only Arch Coal benefits, I would pass on this "opportunity" to turn our natural splendor into smoke, for the greedy idiocy it is. Further, I would absolutely avoid setting such a self-injurious precedent. The Roadless Rule is there for a reason."

Richard Glass OR 97402-3838

And now we are at the Paris climate talks right now seeking to reduce the US's carbon footprint, and at the same time, the U.S.Forest Service is considering allowing methane-spewing operations to occur with ensuing coal extraction? What madness is this! And what hypocrisy we would be showing to the world! Keep coal in the ground."

"I tend to be prejudiced in favor of the USFS, because of the good land stewardship and wonderful outdoor opportunities made available to me by the USFS here in TN and NC. -> Because of decreased demand for coal, CSX Railroad has this year shut down its Clinchfield RR from Kentucky to South Carolina. The Clinchfield transported a huge coal train every two hours just a few years ago. I understand that there are similar situations elsewhere; in light of which, WHY would the USFS allow Arch Coal to destroy intact Colorado lands to get at coal, now?? Kentucky and WV are already notorious for their toxic, ugly coal regions. Please do NOT allow Colorado to join that ignominious list. Forest Service lands in both the East AND West are best used for wildlife, carbon-capture, watersheds, exercise, recreation/inspiration, etc. Please put the brakes on all fossil fuel extraction. The 130 million tons of climate pollution that burning this coal would release is unconscionable. Coal plants are closing all over the country, and many major religious and educational institutions and foundations are divesting from holdings in coal, realizing the damage it is doing to our children's future. Jill Grundfest NY 13439-4723

"I think it is appalling that the Forest Service is even considering allowing our national forests to be decimated by a coal company. Forests are our heritage, they are essential for wildlife, and the Loophole in the Colorado Roadless Rule should be permanently closed!"

Margaret Grunwell VA 24503-2614

"The National Forests are suppose to be the legacy of not only the government but the people of our country towards our future population. As our wooded areas are shrinking this outposts to the natural history of the different locations across our country are under attack. Mining, timber, fracking (a form of mining but they try to hide it in this term) industries are promising one things and not delivering on another. They don't tell about the destruction they cause not only to the woodland areas but to the wildlife, the pollution that always manages to get loose into the environment making the destruction even worse and instances near waterways poisoning that water and killing any life it had supported. This is suppose to be for all the American people to share not a company to gain profit from."

Andrea Gruszecki IL 60174-1116

"we need to move out of coal. But even more, we need to preserve our forests. No more leases for degrading our national public lands should be granted! For any extractive corporate industry, whether lumber, mining, or water extraction."

Tim Gudukas FL 32127-2209

"We now have the technological capabilities and the working knowledge to truly transition to a more modern, much cleaner and healthier plan to provide energy to our human populations that is much, much less harmful to the environment. There should be no doubts, it is Earth and its entire collective natural system that has provided life the ability to exist and flourish. Yet, we continue down a path foolishness that results in the continued mass destruction of natural areas and the continued, relatively unabated burning of fossil fuels resulting in the poisoning of the air and water which is so vital and necessary for life. There is no acceptable excuse that is sufficient to support the destruction of the very system that provides life in the first place. There is no excuse; we are to blame and we are responsible."

Maxine Forster Guenther NJ 07701

If they really think they can get away with such a outlandish, illegal and climate killing move without our brick wall in the way, they are nuts! Start working for the people and not the corps and filthy politicians! We will have it no other way- I promise!"

William Gunderson NY 10974-1705

"Dear U.S. Forest Service, Seriously...if you don't mind the whole planet turning into a smog haven like Beijing, then you can allow all the coal mining that you could ever dream of. If nobody cares anymore, like many Americans apparently, then you could go through with further plans and help to lead us down the path to a much bigger disaster still to come. Thank you and have a lovely day"

"No more coal mining period. This country---and the world---can't handle it. We're dying from fossil fuels."

Brian Gunn

WA 98002-7086

"Regulations and rules are put in place to keep our communities and families safe. Allowing fossil fuel companies to circumvent these rules and regulations just to make a profit endangers human health and puts our communities at risk. Forests take polluting carbon out of the atmosphere, so we should be

planting more trees, not bulldozing what we have. The reckless drilling planned would not only result in more dirty fossil fuels being burned, but tons of dangerous methane gas would also be released.

Methane is even more deadly than CO2 since it traps more heat and destabilizes our climate. We have a duty to protect future generations; retaining the Colorado Roadless Rule is the best way to ensure that our grandchildren inherit a safe place to live, work, and raise a family."

"When this next university class graduates, you will see how these young people will fight you on this issue. Time for a change: you've done more than your share of polluting. Every person in your company has the same responsibility and guilt (if they are still capable of that emotion)."

Chester Gustafson MN 55340-9651

Thank you."

Paul Gutelius

"The Paris Agreement of almost 200 countries set ambitious goals to protect the air we need to breathe. "1.5 to stay alive." Coal is a major contributor to the problem. If we cannot stop coal mining completely (and we should) at least we should not kill our wild areas just to facilitate our own suicide. Christiana Figueres said it best: "I am often asked what keeps me up at night. Here is what keeps me up. I see seven sets of eyes of seven generations beyond me asking me, "What did you do? "After living for a time in Colorado, I can tell you, Colorado is not nearly as beautiful the tourist brochures would lead you to believe. It does not take much wandering off the beaten path to see that Colorado has been decimated, the land has been raped by generations of fortune seekers leaving their toxic waste and a landscape forever scarred. The saddest part is that this is mostly on public lands. Yet, the only ones that benefit are the mining companies. We people, that own the land don't see anything of the pennies on the dollar that the land is leased for, let alone any profits from the exploitation. Please stop this giving away of our lands and its resources. And by all means, allow untouched land to remain untouched. As stewards of this planet, we can learn a lot from the indigenous peoples of the world. Simply ask them their opinion on the appropriate steps to take for the good of all concerned. They are willing to share their wisdom ...if only asked."

"Roadless means roadless, period."

Melina Hammer NJ 07307-1820

"Now more than ever we need to keep fossil fuels in the ground. We also need to keep intact our national forests now more than ever. The world's ecosystems depend on habitat and clean air and water, as do we humans."

Myrna Hammerling MA 01201-6209

"Coal is not the way to influence climate change targets needed by the entire planet!"

John Hammond CA 95472-3754

"It's absolutely ludicrous that I even need to tell you that it's not okay for anybody to be mining our pristine forests. Public land is not for private use. These places are to be kept safe, in their natural state for our children's children, and the great benefit to our environment and ecosystems that they provide"

Jay Hammond OR 97520-2305

"Coal, really? While we are in the midst of massively destructive global warming? And to boot, we have to extract it from a roadless area? Let me guess, the coal is under a layer of defenseless baby seals too so it is just too irresistible to pass up. There is a lot of low emission and clean energy readily available today. No more lining the pockets of dirty energy at the cost to the rest of us."

Karen Hammond TN 38425-5221

"Please let's start making changes before it is too late"

Brenda Hammond TX 75243-3614

"I don't know how many ways we have to say that it's vital to our future to preserve our natural resources and transition to clean energy fuel sources. Destroying land to mine new coal is not the answer, you know this.

Why is this even under question? Do the right thing here."

Don Hammond TX 78727-3042

"We don't need any new coal mining. Besides climate change, coal also causes health problems - increase heart attacks, increase asthma attacks. Overall, other energy sources are cheaper."

Carol Hampton CA 94965

"Please protect the legacy of the forests!"

Ann Hancock ME 04074-9404

"I am aghast that this proposal is even being DISCUSSED. This is WRONG. With climate change at the forefront of the news, it is unthinkable that this company is trying to rape this land and extract the coal in a last desperate rush to mine it while it is possible to do so. I am planning to visit Colorado next April on an organized bird watching tour. The forest service should take into account the tourism that Colorado's pristine landscape supports, and not go for dirty one-time profits that will leave an irreparable scar on the land."

Kathleen Hancock WA 98237-9558

"The use of coal is not only deforesting our globe, it pollutes the air. Folks like me, with COPD, have a difficult time breathing as it is. Please don't allow taking down more trees (that generate oxygen) and burning more coal (that uses oxygen)."

Joanne Hand

"I considering this permit for this company to bulldoze through OUR national forests and tear up hundreds of acres in order to extract the dirtiest form of fossil fuel, please also consider where this coal will be used. As coal for energy is being phased out now in the US, more and more of the coal our corporations are extracting are being positioned for sale in other countries. Ports are being prepared for coal shipping. Why should our pristine forests be destroyed so that all this dangerous carbon can be burned by other countries and just used up? We are right now in Paris working to reduce our carbon emissions and the first step on this path is elimination of coal burning for energy production! As our first line of defense in protecting our forests please insure that they are not wasted so that other countries (or even our own) can just use them up as sacrifice for atmospheric carbon production we can't afford and that will only cause extreme harm to our future generations. Thank you for considering my concerns."

"Roadless forests means that I can not even go 4x4 touring (off road) because of the environmental damage it (supposedly) causes, yet there is a consideration to strip the same forests for coal mining! That is beyond the pail and one of the most discussing things I have heard in quite a while. It would be

pure idiocy to allow that to happen never mind even considering whether you believe or not that anthropogenic global warming is occurring; never mind that and consider the following: It is far too destructive to the streams and watersheds that people's drinking water and farms irrigation depend on. It is a well established fact that

coal extraction leaves mine tailings that have to be contained somewhere and well known fact that the tailings contain mercury, arsenic, and sometimes are even radioactive uranium and other toxic minerals that even under the best circumstances and conditions some of those and other toxic contaminants will leach into the surrounding environment. There is the law of averages which also must be considered that there is likely to be extreme weather events and human error that are unavoidable which would eventually wreak disaster beyond the abilities of current technologies to be reasonably considered as adequate to mitigate such an event. At best even those things to consider are only the tip of the iceberg so to speak. There are also the loss and destruction of forests and the unique ecosystems in and around them that the coal mining interests don't care one iota about that must be considered that effect the their neighboring interests have now and into the future. Bottom-Line: don't allow Arch Coal or any other like mineral extraction schemes to devastate or otherwise destroy our forests and surrounding ecosystems and populated neighborhoods just so they can make a profit at the expense of the tax payers when they fail to be able to maintain what they promise as is coal extraction historic legacy has been since it's creation."

The impact on wildlife is devastating. The health of local humans is damaged by mining as well. And COAL?! Tell Arch to start investing their money in renewable energy technology -- if they have two brain cells to spark together they will see further down the road than the next 10 years of profit. I hope you will look at the long term destructiveness of this whole venture and the big picture. And also think of the millions of living organisms which will be destroyed on and around this site.
