"Coal is dead. Please leave the forests alone."

Jeffrey Heist PA 17408-7113

"Please do not let Arch coal mine these pristine forests. There are too many coal mines already. Help stop climate change."

Barbara Heitz CA 90049-4011

"Forests make the oxygen we breathe. Not one more tree should be cut down in our forests or the world's rain forests to satisfy coal or palm oil corporations."

True Heitz CA 94930

"Terribly important to stop thr re-opening of thr loophole!!!"

John Helak

NJ 07675-6609

"Coal? Why are you pushing America back 100 years?"

Andrew Held MA 02138-3339

"Destroying forests to dig coal is obviously counter-productive."

Liz Helenchild CA 95460-1276

"The only winners in this pillage will be a few top execs at Arch Coal. Do not sell out!"

Sharl Heller

MA 02360-1365

"Stop destroying the last of our forests for dirty energy."

Lisa Heller

MA 01002-2814

"What sense can it possibly make to attend summit meetings in Paris while permitting immeasurable damage at home?"

Margaret Heller NY 11946-2287

"You are robbing US citizens and the planet as a whole, of what's left of natural beauty. Think of global warming, think of our children and then think about what you're about to do."

Lorraine Heller OR 97229-6385

"We now know that fossil fuels must stay in the ground if we wish to save life.. We need to promote only sustainable energy."

Walter Helm CA 95821-3932

"Please do not ruin one of the best forests in the west. Please do not allow anyone destructive roads for Coal and allow them to further pollute our environment. Thank you, Walter"

Annabella Helman IN 46077-8518

"The act of coal mining not only emits dangerous greenhouse gases into the atmosphere, but also allows toxic chemicals to seep into the soil and groundwater. People and families living out in rural areas find their source of water from wells and streams but if the aquifers and streams are tainted with the acid mine drainage that occurs from the 'waste' of tailings piles and remains from mine site processing, then

diseases spread as well as casualties will be on yours as well as Arch Coal's hands. Obviously, the health of the American citizens and wildlife should take precedent over the wealth of the few who benefit from the Arch Coal Industry. Please take all aforementioned reasoning into consideration when discerning your action."

Sharron Helmholz CA 95008

"Coal should stay in the ground and wilderness should be preserved. Why should we even consider further damage to our planet just to make the fossil fuel lobby happy?????"

Paul Heloskie NY 11783-2702

"this action would be bad for the environment only good for coal mining co."

Ann Helt

IL 60516-1445

"We need our trees for air quality!"

Carol Hemingway CA 93105-2539

"Stop this climate killing coal mining!"

Otis Hemmings NY 10451-4783

"Protect the People, Environment and the Air we Breathe. Please keep in mind that the Public Trust in what you do for us. Equal Rights And Justice For All People. H.I.M..."

Peter Hemp CA 96041-1843

"There is a reason you are known as the U.S. Lumber Service. Permissive management seems to be one of your genes."

M Hempel CA 92375

"The burning of fossil fuels causes climate disasters. We need to stop mining coal immediately."

Sherry Henderson GA 30004-6928

"Our forests are the crown jewel of our nation. We should protect them."

Nancy Henderson MA 01773-5109

"the pillage of Americans' wild lands must stop."

Diana Henderson VA 24401-4713

"Please stop ruining the earth for a quick buck."

Donald W. Henderson, Ph.d.

NY 14850-9641

"Our wilderness ecosystems are fast disappearing and need to be preserved wherever possible. With climate change, coal has no tenable place in our future economy. Government must take the lead in rapidly reducing our reliance on coal. The Colorado mining proposal is without merit ... it has "no redeeming social value"."

Lynda Hendrell AZ 85715-4318

"First of all, that coal needs to stay in the ground. Burning all that will contribute to the climate disaster already in progress. Secondly, remove all that precious forest is a crime against the earth, against our

nation's resources. Those trees remaining alive, doing their job of protecting the soil and taking in carbon dioxide, are much more needed than that coal beneath them. Arch Coal: get started in the field of clean energy sources! All the money you would spend on destroying the environment to get to that coal--use it to develop a clean energy source instead. Coal is the PAST, it has already destroyed enough of our country's lands and forests. Please start moving toward the FUTURE."

Cordell Hendricks

"Are they soo greedy that they would rather make some cash than have a clean world for their children."

Borg Hendrickson ID 83539-5211

"The whole idea of allowing destruction of pristine roadless forest anywhere is misguided, but to allow its being done by a coal company at a time when coal is being phased out as a fuel and when climate change is being addressed globally, is just plain insane. I know the USFS doesn't have its head stuck in a hole in the ground; I know the USFS recognizes the destructiveness of Arch Coal's proposal. Only politics could persuade the USFS to approve such destruction. However, cowing to politicians on a matter of this seriousness should truly rip at the souls of USFS officials and personnel. It's time to stand up to politics, stand up to Big Coal, and to do the right thing. No Arch Coal bulldozing in pristine roadless forests."

Arlene Hendrickson NV 89130-1656

"Stop the bulldozing of the forest for Arch Coal. This is destroying our environment. Which can never be brought back to its natural state. This will add to all the more Polution which is in healthy to humans."

Terrill Hendrickson WA 98021-7922

"We have to stop harvesting carbon from the ground, in order to turn it into carbon in the air and in the oceans. The consequences are warming, weather extremes, and acidity. All are toxic to life on Earth as we currently know it."

Donna Henes NY 11238-4400

"Forests cannot be replaced. Do not cut them down."

Tony Henline MD 20902-3252

"We don't need more coal, we need more alternatives to coal."

Kim Henney NM 87110-2658

"The last thing this precious Earth needs is more coal out of the ground. STOP it."

David Henning IN 46628-9059

"Don't help greed destroy our planet!"

Glenda Henning WI 54449-9653

"Precious roadless forest areas have not been protected in order for a coal company to destroy!"

Faye Henrie

NY 14620-2111

"For the love of God, protect the little good land we have left. For our children!"

Lars Henrikson WA 98126-3557

"It's time to stop the destruction. Let's leave a habitable planet to our future generations."

Roger Henry

AR 72702

"We don't need to lose forests for coal!"

Tamara Henry CA 95066-4114

"Coal mining is the way of the past; let us invest in the future, in sustainable methods and energy."

Rebeka Henry CA 92104-1392

"The climate change panel that took place not too long ago should be a reminder of the importance of preserving our forests and protecting our environment. We must not forget about how our current actions might affect the future generations"

Jocelyn Henry FL 34275-1634

"Please leave our forests alone!"

Andrew Henry IA 52803-3228

"We need to utilize cleaner sources of energy in the future. Necessity is the father of all invention. Force dirty power producers to innovate cleaner methods or go out of business. Destroying the environment is not an acceptable option."

Amy Henry

MA 01060-2223

"Let's stop NOW before we destroy every creature and resource on the planet."

Ellen Henry

NY 14534-3303

"It seems obvious that the FOREST Service should be protecting forests -- one of the most important buffers against carbon pollution. More coal mining, especially on public forested lands is utterly inconsistent with the extreme urgency of action to mitigate climate change disaster. Please do your job and maintain our precious and valuable forests!"

Mayellen Henry WA 98008-5123

"The coal needs to be left in the ground and the forests need to be left standing. The survival of our species may well depend on it. Don't sell our future for profit for Arch Coal."

Sandra Henschel OR 97224-1445

"Please make a positive difference for our future generations and set a good example of good stewards of our Earth."

Kira Henson FL 34472-9552

"We must keep our public lands public. It is what we have left of our heritage. Please no mining."

Nancy Henson WA 98520-9624

"Keep it in the ground!"

Denise Henyard CT 06513-4432

"Thank you for reading my letter.and please don't take away natures wonderland ."

Chet Hepburn VA 22205-2322

"destroy the forests, destroy the human race"

Juanita Hepler ID 83712-7849

"Stop -save forests"

Kristie Lee Heraghty CA 93312-5473

"Preserve our forests for our future."

Dianne Herber TX 78626-4808

"We need the benefits of the forests, not coal or coal mines. Yes, it's true. Check it out; educate yourselves. Alternative energy is our future and we need to stop depending on coal, oil, and gas energy. We need forests to clean our air...to keep breathing!!!"

Jill Herbers

NY 10010-3822

"You know the right thing to do. Please do it."

Annabelle Herbert AZ 85719-5974

"What a horrible thing to propose, a road through pristine forest to allow a polluting giant to process coal? FOR SHAME!"

Wendy Herbert CT 06471-1825

"Keep the coal in the ground."

Patrick Herbert GA 30093-1732

"Nature needs to be preserved for the creatures that inhabit the forests as well as for our posterity. Therefore, roadless bulldozing for arch coal should not be allowed."

Bryna Herbold CA 91711-2741

"We need to protect forests and we also should be cutting back on the use of coal! The time for alternate energy is now!"

Teresa Herbst

"I find it offensive to our nation, and the people who love nature, to even consider paving way for ANY company to build roads for mining purposes. The US needs to implement stronger language in legislation to PREVENT the possibility of Arch Coal or any other companies from "buying" politicians. We need to be realistic about Climate Change, and only work towards mean of reducing our footprint on the earth through clean energy sources ONLY, not gas, oil, or coal!!! Do the right thing."

Kris Herbst

"I oppose allowing Arch Coal to gain more profits by damaging our roadless forests."

Jeff Herdrich HI 96761-8900

"Save our forests and start planting millions of trees. We must stop poisoning the planet. Switch to clean zero emission green technology resources."

Kathleen B Heritage OR 97537-1035

"The earth cannot afford this!! Which means that our lungs also cannot afford it. Don't allow this rape of our heritage."

Bill Herman

CA 92056-2940

"It should not allow Arch Coal to reap profits while adding huge amounts of climate pollution to our atmosphere, all at the expense of wild, roadless forest!"

William Herman CA 94952-3023

"Using COAL is not our way into the future, stop it now and clean up our air and water. Think of our grand children and great grand children future and health."

Paul Herman IL 60560-9805

"We need the forest to promote clean air and for the wildlife to continue to thrive & live. No more clear cutting, we don't need the lumber or devastation to our natural resources. We desperately need the forests of which many have already turned into deserts because of clear cutting. Thank you."

Magaretha Herman NC 27704-4328

"Those of us who desire to protect our earth and our nation demand that no more fossil fuel extraction take place on federal lands, including our forests. NO MORE."

Allan Herman NY 10033-2143

"This country's natural wealth belongs to the people not the corporations. Please stop subsidizing corporation!"

Bruce Hermon V5B 1N7

"What an idiotic, irresponsible, and criminal enterprise, destroying forest to build a new coal mine in this day and age. Everyone associated with this project should be publicly hung. Divest from big oil, invest in renewable energy sources, and institute global human breeding limits NOW."

Charles Hernandez CA 91606-3151

"This is wrong on so many levels. Environmental, legacy, and political are just three of the myriad categories the wrong belongs in with many reasons beneath each category. Stop this. It's irresponsible, dangerous and

just plain greedy with no regard for anyone or anything else."

Robin Hernandez CA 95116-2424

"This would be the worst. Please don't allow it to happen."

Ezequiel Hernandez FL 32583-9276

"Please save our children future"

Vilma Hernandez NY 10463-4206

"We need to start taking care of our world. Too much damage has already been done!"

Viola Hernandez TX 77506-3966

"Please protect our environment and do not destroy the forests of our country!"

Erika Hernandez TX 77040-5204

"Stop the coal mining"

Mary Herndon TN 37013

"Do not let Arch ruin the Colorado forests! It disrupts the whole ecosystem --plants, birds and animals!"

David Heron CA 94611-2741

"Please use your common sense and do not pave a road for this. It's disappointing that you would even consider this."

Amy Herren NY 10027-2756

"Stop this!"

Cassandra Herrera CA 90250-8002

"U.S Forest service this is the time to step up and step away from coal use. We as human beings and wild life are demanding this. Our world demands it all of humanity and wild life our lively hood. We supposed to headed towards clean renewable energy. Please step up and say no to coal. Thank you"

Isela Herrera IL 60165-1025

"Please strongly consider rejecting this loophole. I believe it is our responsibility to protect and sustain our environment from further and unnecessary damage. If we don't fight for our world, no one will."

Ron Herrgesell NY 13088-5003

"Personal and corporate/business actions seem always to cause a great deal of harm along with whatever good they hope to accomplish. I wish it weren't so, but personal actions tend to be inconsiderate/thoughtless and with corporate they are so because of the increased cost to be otherwise. The only action then is to forbid all actions from either party. TOO BAD. Sorry!"

Pamela Herrick MA 02653-1894

"Born in Colorado 83 years ago.. I ask you to stop destroying the wilderness and animal habitat that we, as a civilization, need and want."

Carol Herrick VA 22902-7290

"At this point, and after all we know about its effects on our environment, why are we encouraging more coal mining? This kind of short-sightedness is the very thing that has gotten our natural world into such bad shape. Please make the right decision today to ensure a healthy world for all our children tomorrow. Thank you, Carol DiCaprio"

Randy Herrington NY 12094-3310

"we need to stop dirty coal use now!"

Dorene Herrmann IL 60177-2311

"Please leave the forests intact. The time spent cutting them down could just as well be spent finding alternatives to coal."

Jane Herron TN 37064-4777

"I cannot believe this is even being considered!"

Joshua Herting TX 78749-1116

"The money and efforts put into this need to be put into other forms of energy and not into destroying our planet. We need to develop more of a respect for the planet we live on and not take it all for granted."

L Hertz

AZ 85250-5644

"Why are we still using coal? There is no planet B"

Ellen Hertzmark

"As a country, we should be moving away from coal as a fuel."

Christine Hervig FL 34233-2446

"Coal is dead--support solar industries."

Julia P. Herzberg, Ph.d.
NY 10128-1244

"Since coal mining is unprofitable, unhealthy to the environment, in need of huge subsidies, end the coal mining in NY state. Pay the coal miners one year of wages and put the rest of the annual subsidies to better use. Or lower the amount of money that we electrical users pay on our bills."

Timothy Hess FL 34452-5836

"Tired of the pollution and destruction by coal mining companies and fossil fuel power plants."

Lowrey Hesse AL 35976-6129

"Why should we allow the destruction of pristine areas and the habitat of 100's of our wildlife to obtain an air polluting substance and to make profits for a company such as Arch Coal. Money would best be spent on non-polluting forms of energy."

Joanne Hesselink WI 54960-8256

"Coal is a dirty fuel to start with, and should be kept in the ground. A roadless forest is the last place that should be destroyed to dig more coal out."

Patrick Hesselmann AZ 85306-4538

"The roadless forests are needed to sustain wildlife, and not to extract minerals, including coal, in a manner that destroys so much habitat."

Thomas Hessley PA 16365-3354

"We should also stop drilling for oil and gas in roadless forests."

Lori Hester

TX 75038-3804

"It is time to stand up to Big Businesses that propose to destroy our country by destroying the land on the premise that it will create a lot of jobs, which in the end creates very few. All this to cover up the real agenda, furthering the greed mongering that is insidiously taking over this country."

Elizabeth Hestnes MA 02493-1333

"This is an outrage particularly if it is allowed to continue."

Eleanor Heston OH 44039-4436

"I can't believe it is necessary to have this petition with the knowledge available to us about coal and the importance of trees and the erosion that is destined to occur from this action."

Virginia Hetterich NY 11701-4207

"We were given this planet by a Creator of exquisite design for our care and safekeeping. This creator (or

God) has promised to restore the earth to a garden paradise and bring to ruin all those ruining the earth."

Michael Heumann OR 97212-4844

"Leave it in the ground. Now is the time when we need to stand and protect our pristine places. Please reject the loophole in the roadless regulations."

Nicholas Heurich NC 27613-8409

"Keep pristine woodlands the way they are."

Dwinell Heverly NM 87701-9667

"Will you stop at nothing for your profits?"

Karen Hewett MI 48051-3817

"Keep coal in the ground! USA wants to move forward being clean and green!"

Anthony Hewett NJ 07652-1704

"Please do not re-open the loophole in the Colorado Roadless Rule closed in 2014 by court decision. How any coal company could contemplate bulldozing across thousands of acres of roadless forests when the world has determined to stop polluting the environment in Paris this month beggars the imagination.

Already we can see that climate change will make 2015 the warmest year on record. This very month of December could well be the warmest our records have known. Coal is the most polluting major fuel source still in use. To facilitate further exploration would be outrageously irresponsible."

Sandy Hewitt MI 48197-3706

"Please do not allow the pristine roadless forests to be bulldozed. We need to maintain and protect these environments."

Maury Hexamer CA 92111-6042

"Arch Coal must not be allowed to bulldoze across thousands of acres of pristine roadless public forests. Just so they can reap huge profits while destroying our land so they can add hundreds of millions of tons of climate pollution to our atmosphere."

Margaret Heydon OR 97024-8779

"Once we breach this frontier, there will be no going back to retrieve our priceless heritage! Keep our roadless

wilderness safe!"

Bill E Heyman NY 11793-2627

"How is this even possible after the global agreement to cut back?"

Diana Heymann CT 06110-1115

"Please do not allow this coal mining project to go through. We need to be working on diverse options and strategies to keep what's left of the fossilized material of the earth in the ground. We need to restore our earth to safeguard our lives and the lives of our children and grandchildren. Please, hear my plea."

Damon Hickey OH 44691-2372

"We need more trees and fewer coal mines. These are OUR forests, not the mining and timber companies' forests. You are our stewards. Please be faithful ones."

Brendan Hickey PA 19380-6111

"We have to protect these forests. They are tools to protect us from climate change."

Mary Hicklin CA 92040

"As you well know, roads do virtually irreversible damage to wilderness areas. Please do not accept Arch Coal's plan to destroy our wilderness."

Charles Hickling FL 33173-2765

"Please take a moment to consider the long-term consequences of destroying this forest land. Think of your kids and grandchildren. Thanks."

Simone Hickman FL 33917-4836

"We must oppose corporate greed before every last wild place is destroyed by it."

Jeannette Hickman NC 28226-7611

"We do not need more coal. We need forests which help keep our air safe for breathing . We don't want terrible air quality like China"

Troy Hickom

"This move is far from intelligent. Mothernature will not stopped with money."

Robert Hicks CA 90803-2545

"This project looks like the product of a "captive" regulatory agency. Please consider the common interest of the people and our country's future, and respect the Colorado Roadless Rule."

Garland Hicks IN 46383-4217

"This mine sounds like a really really bad idea."

John Hicks

OR 97477-2162

"Forest land is hard enough to come by to see it destroyed for a product that is so harmful."

Marylee Hicks TX 78744

"My aunt described Colorado as " the purdiest place this side of Heaven!" Are you getting paid off? Do you not have a conscience? The time for fossil fuel is over ! Renewables are being created daily! PLEASE NO MORE COAL MINES! MO MORE CARBON POLLUTION! Bulldozing new roads in forests threatens the wildlife's survival! This is a terrible idea !"

Eldon Hiebert FL 32720-6013

"We need to protect what remains of natural America."

Richard Hiers FL 32607-2758

"To head off the now all too imminent climate disasters resulting from CO2, methane, and other human- related greenhouse gases, preserving health forests will yield much greater benefit than mining and then burning coal."

Nancy Hiestand

CA 95616-3523

"Coal is not the way of the future. Preserving forests and renewable energy are."

Walter Higginbotham AR 72712-4631

"Please stop this senseless act. Leave the forest alone!"

R Higgins

"Members of the Forest Service please prevent the destruction of our forests. Coal can severely damage our environment and the rest of the word. Do we want to live in unhealthy fog like the people have to in their cities? It will happen, if we do not take action against it now. Thank you for caring about all creatures."

Cheryl Higgins

"Stop dumping carbon into the atmosphere!"

Norman Higginson MI 49418-1342

"This is a form letter and I support its content"

Mary Ann Hight FL 33912-0964

"By destroying the wilderness we are killing the goose that lays the golden egg."

Jeff Hight NC 27106

"Stop destroying our environment and displacing our wildlife!"

Paige Hildebrand NV 89509-7432

"I am grateful for your interest in the overall wellbeing of not only the people, but the entirety of the world. We forget that humans are only a small component of the workings of Earth and we need to respect and maintain this balance to ensure a thriving future for the generations to come."

Virginia Hildebrand PA 18707-9720

"Has the Forest Service lost its mind?"

Todd Hildebrandt OR 97437-0189

"It is no longer acceptable to prioritize taking energy resources without seriously considering the global and real environmental impacts. Your job is not to maximize corporate profits. Keep the loophole closed."

Edwin Hiley

PA 18810-9591

"A road to a disaster site is part of the disaster. No road, no disaster. Keep it in the ground and let the forest (collateral damage) do its job of cleaning the air and preventing erosion."

Tom Hilgartner WV 25314-1637

"Allowing this loophole would be an act against the welfare of our planet, our environment, and human life--all in the name of short-term financial gain for a comparatively tiny group of... Well, let's just say that it's up to you to save them from themselves."

Rowena Hill

"What incredible hypocrisy, just after the climate conference!"

Judith Hill

CA 95825-4312

"Please STOP destroying our earth!!!!!!!!!!!!!"

Laura Hill

CA 90853-4364

"We must preserve what little we have left of natural landscapes."

Ruth Hill

GA 30281-4154

"Do not allow Arch Coal, or any company, have access to the pristine forest in Colorado for mining. This is pure greed at the expense of the air we breathe and the habitat of animals and humans. Especially when the government is trying to make changes to our energy means. Let's put a stop to this insanity NOW."

David Hill

KY 40511-8810

"No company profit will ever match the horrendous loss to American citizens. D. Leslie Hill"

Maurice Hill KY 42553-9146

"Why destroy the environment. We gave other resources to replace coal. Taking down more trees hurts our air quality"

Bonnie Hill

MI 48439-4306

"Please do not allow any more destruction of our country and people because of greed and the insatiable need of Americans for taking more wild and wildlife habitat for their own."

Brenda Hill

MO 64034-8986

"WE NEED TO BE GETTING AWAY FROM COAL--NOT MAKING IT EASIER TO MINE. AND WE DO NOT NEED TO DESTROY PRISTINE FORESTS TO TAKE WOULD WE SHOULD BE LEAVING IN THE GROUND. THE FULL COST OF COAL IS NEVER MEASURED, BUT IT NEEDS TO BE~LIKE HEART & LUNG DISEASE & CANCER & THEN ROADS THAT DESTROY OUR CHILDREN'S HERITAGE. PUT THE MONEY INTO SUBSIDIES FOR SOLAR & WIND FOR A CHANGE INSTEAD OF COAL ROADS."

Bonnie Hill

NH 03273-0485

"Please protect this pristine forest land from ruination by coal mining. Coal is not the energy of the future, and

the damage to this land will be there long after we have moved away from using coal for energy."

Victoria Hill
NY 10601-1510

"Shame on you, Forest Service!"

Jim Hill
TX 78716-2602

"Please take the necessary steps to stop Arch Coal from bulldozing thousands of acres of pristine roadless forest in Colorado. Leave it in the ground!"

RL Hill
VA 23606

"Stop raping the earth"

Michael Hill
WA 98330-0323

"Leave it in the ground for goodness sakes..."

Jan Hillegas
MS 39207-3234

"Hard to believe that you would even think of allowing such a travesty !"

Robert Hillenbrand FL 32128-6657

"Unless there was a demonstrated national emergency need for this coal I can't see the requirement to destroy all the forest environments ! Remember these are environments never to be replaced. At a time when greed exceeds need - just stop and let the forests "be"."

Mark Hillenbrand IL 60453-3384

"The last thing we need is more coal polluting our planet. Keep this natural disaster exactly where it already resides...in the ground."

Phyllis Hilmer VA 22407-6903

"Stop this nonsense NOW. Our environment is more important than mining coal."

Rhonda Hilson FL 34979-2843

"It is hard to understand the backward thinking of dirty, destructive energy when the possibilities of forward thinking, clean, sustainable energy sources are so evident. It shouldn't be about money for a few. Instead we should consider the health of our planet and the life that inhabits it."

Larry Hilt
OH 44303-1216

"The rule should stand . NO LOOPHOLES"

Harlan Hiltner HI 96778-9442

"Coal is on the way out so why even consider doing this. This is just wrong on so many levels."

Rebecca Himsl UT 84092-4521

"Don't allow this senseless, destructive mining!"

Anne Hinds

"If trees are the lungs for the planet, why on earth would we allow more deforestation ? What is the impact on the wildlife there? We are having trouble because wildlife are being driven into our urban areas as it is. Why increase that? Please, we must preserve some pristine lands for future generations to enjoy for hiking. This is irreversible damage. Please do not do this to our untouched natural area."

Thomas Hines RI 02882-3045

"No more coal!"

John Hinkson

"Coal mining on this land will totally destroy it. The coal should stay in the ground. Leave the land as it is."

Sarah Hinojosa

"Coal mining is irresponsible. There are much better ways to meet our energy needs without sacrificing the health of the planet for future generations."

Glenn Hinson KY 40206-2836

"We must save our precious heritage. Don't let business destroy it."

Randy Hinthorn WA 98146-1716

"I strongly urge you NOT to allow Arch Coal to enter Colorado forests and build roads. Please put the

public interests ahead of corporate profits. Please put the very likely damage to our planet ahead of corporate profits. Thank you."

Matthew Hinton Hinton LA 70123-7941

"Save our planet, not corporate profits!"

Carolyn Hinton MN 55431-1034

"We absolutely need to stop destroying our planet, polluting our land and water beyond any corporations ability to clean up and doing so for hundreds of years. Most importantly we are long overdue to put our planet, our people, over profits. There are more than enough clean energy options. Coal is obsolete."

Dana Hiscock

"Please do not allow Arch Coal to exploit a loophole in the Colorado Roadless Rule to despoil pristine forests."

Joseph Hiss

WA 98501-2238

"As a retired fish and wildlife biologist and a current environmental educator, I have come to believe that global climate change is the primary issue and unifying factor in the applied sciences. Any action that furthers the extraction of coal harms all the world and its people. I am writing this from a major South American city that is having an unprecedented hot, dry spell that is expected to last for at least three more months. Ask anyone here if a catastrophe is impending! The message: keep it all in the ground. I have worked closely with the Forest service on the district level and know how much good can be done by forward-thinking management. I know you have the power to make a difference that will let us all breathe a little easier!"

"Please do NOT allow Arch Coal to destroy what is left of Colorado's forests! Our family has lived in Grand Lake since 1930; I do NOT want to see coal mining operations adding to the air pollution and destruction of our world's atmosphere nor tearing up animal habitat! Do NOT reopen the loophole in the Roadless Rule, please! Trout populations will be impacted by the degraded water quality. We NEED those tourists and trout fishermen to spend money on licenses and gear. They WON'T come here any more if it DOESN'T remain the beautiful respite it currently is! We can NOT take those tourist \$s for granted! In the name of HEaven, stop the destruction and DON'T re-open the loophole!"

It is the displacement of suffering from one people to another, and the shifting of ecological horrors from home to abroad. The net beneficiaries of this system are wont to ignore it or even question its basic functionality. These twisted parasites see images of the dying world and ask, "Why don't they move?" If well-being, not growth, is our goal, selling resources that bring long term well-being to communities for short term gain is a very bad deal. Protecting the ecological resources of communities is in fact much more important than abstract GDP figures."

Richard Jeric OH 44057-1333

"Like we need another company ruining our environment for profit. I thought the Forest service served taxpayers not profits.Close the loophole for good!!!!!"

Maynard Jerome IL 60410-5369

"It's completely crazy to allow coal mining in roadless forests. Why should the government allow companies to profit from mining a major pollution source in National Forest lands? Ever hear of "global warming" or nature preserves for the American populace??"

Danielle Jesensky TX 79701-5943

"Please keep this loophole closed! We owe it to our children to protect our environment."

Kelsey Jessup CA 90049-4455

"We have very few roadless forests left in this country. These wild forests are critical to our well being for both intrinsic value and the ecosystem services they provide. Building roads and allowing coal mining will be incredibly destructive! Not to mention, we should NOT be using our resources for nonrenewable and

dirty energy sources like coal. We should be investing in renewable and clean resources. Please please don't

let this loophole be a reality! Protect our roadless forests and stop mining for coal!"

Ken Jewell MI 49726

"Leave the forests be. They are providing many precious aspects just as they are. That are just as important. Always, always strive to find other alternatives. Thinking outside of the box, so to speak. Please, find another way."

Pamela Jo

"I can't believe with all the scientific statistics about climate change and how fossil fuels are ruining the environment - that Colorado is even considering a proposal for Arch Coal to destroy more pristine forestland. PLEASE do not allow AC to add more pollution to our atmosphere or destroy forests that our wildlife depend on. Let's start seeing some environmental consideration!"

John A Joadwine WI 54701-4615

"We're running out of time to protect the Earth and its wonders--bulldozing forests that take hundreds of years to recover and lose wildlife habitat and the trees ability to clean our air is not an option. Don't let it happen."

Patricia Joanides CA 94973-0046

"Please stop up to 65 miles of road from being bulldozed across 19,000 acres of roadless forest, degrading habitat for black bear and elk, goshawk, lynx and trout...all to benefit one corporation. Let's join to save our habitats for animals and people!!"

Benjamin Joannou Jr FL 33156-7046

"Not only do we need to keep coal, which is sequestered carbon in the ground, safely sequestered, but we should not be destroying trees, which also sequester carbon. We actually need to be finding ways to sequester the carbon that we've already released into the environment over the past 200 years. That will be extremely difficult and costly to do. So at least let's not release the carbon that nature has sequestered for us."

Bela Jobb

MI 48506-3394

"It is ecologically destructive for ANY sort of mining in any forest let alone in pristine roadless forests. Subterranean mines are destructive enough by dumping the non productive byproducts of their operations. STOP MINING IN ROADLESS FORESTS NOW!"

This is not an economic issue; it is a moral issue. Preserve every possible inch of native ecosystems worldwide!"

Robert Johansson AZ 85338-5706

"it is time to move from coal, the worst for our climate problems and toward renewable energy, keeping the trees which remove CO2."

Nadine Johns CA 95482

"Please do not reopen the CO Roadless Road loophole. After the Paris agreement, it seems senseless to allow more coal production as well as destroying pristine forested areas."

Elizabeth Johns NC 28702-0091

"Given the environmental issues all over the world, particularly with regard to climate change, it is nuts to even consider using a loophole in the Colorado Roadless Rule to allow Arch Coal to add 139 million tons of climate pollution to our atmosphere. What are you all thinking?! Again, it is nuts."

Barbara Johns PA 17339-9522

"This is a huge issue. All coal mining should be shut down for these reasons. There are no roads going into any of these coal mines. Do not make any roads going into these coal mines. Leave these coal mines alone. How many people have died in coal mines? Coal mines are dangerous. This is no joke. This is very real. This is very serious. This is reality. How much more reality does it truly have to get? The coal miners do not feel safe going under ground. Coal mines are not safe. Do not make roads if there is no roads. Don't destroy any forests because that would not be to smart. There should be no coal mining when there is no roads. No trees should be cut down. It would ruin the environment for sure. Coal mining is not good. This is unsafe and unhealthy. It is always dangerous. People have lost their lives in coal mines. People can't keep losing their lives in coal mines. Not one coal mine is safe. It does not pay enough to go into something that dangerous. No one should risk their lives for something like this. You people do not know the danger of these coal mines. Keep coal mines out of our environment for good. It is dangerous to people and animals."

Anne Johnson

"This coal mining is not justified in light of the need to eliminate fossil fuel as an energy source. It is estimated that 100 million people will be forced to abandon their homes just in the US, and that most coastal cities will be flooded in the next 100 years if we can't stop climate change. Take the long view, do not allow this mining to take place."

Judith Ann Johnson AL 36268-7186

"Mining and burning coal is absolutely counterproductive to the urgently critical need to end human- caused climate change. Destroying forests to do it adds to the impact. Destroying hitherto untouched ecosystems to do it goes against everything the Forest Service should stand for. The damage will be permanent; the benefit is non-existent and In fact negative. The coal company must find more useful

things to do in the modern world."

"Solar energy is now more affordable than coal. The world is aware of this. The coal that Arch proposes to extract is a prime example of fossil fuel that should and must be left in the ground, for our kids, grandkids and great grandkids to have a clean atmosphere to breath. I demand that Arch's project be ceased, and that these precious lands in Colorado not be destroyed for a quick "big bang for a buck" project that benefits ONLY Arch, but preserved for future generations and for the health of the planet. The intention to use of this small loophole is exactly the type of tactic that disgusts the American people. It takes two to tango as they say, so the Forest Service would be implicated in this massively immature and noxious, toxic project, along with Arch. It is not a good public relations move to attempt to extract coal. The people don't want it. It is these types of shortsighted projects that make the world worse, not better. The mining permanently disrupts the local ecosystem, which has become what it is today over

eons, polluting groundwater, causing deaths among important animal and plant species in the biome, and the burning of the coal in whatever form would be a crime against humanity, when other options like solar and wind are easier, and/or cheaper, cleaner, and more ETHICAL. Do the right thing for a better, safer, cleaner world and for future generations. It's your reputation and legacy."

"We do not have countless worlds upon which to live. The removal of forest compounding the removal and burning of coal will cause a huge amount of damage to the environment. At a time when we are becoming aware of our impact on the world's climate, it is time to reassess the damage potential of such actions. This should be considered unacceptable. Please do not degrade our planet further by such irresponsible actions as clearing 65 miles of forested area for the road and whatever more damage will be inflicted by the massive removal of coal. Leave the coal in the ground, sequestering CO2 as it should be doing. Do not allow a company to reap profits from despoiling nature and at the expense of more air pollution and degraded habitat for the wildlife that resides there. Thank you."

Victoria Johnson UT 84501-1514

"The Forest Service is suppose to protect the environment! Not undermine it. Your roads into any area would destroy hundreds of years of growth, ruin the habitat of countless animals and cause mudslides, and for what? Greed. At what cost.? This has got to be stopped not only in CO, but anywhere else in

America. We are suppose to husband the land, not rip the heart out of it . Its not about how much money you can make, how many cars or big houses you can buy. How many more years do you want to breathe without being on oxygen? How much is your health worth? Your children, grandchildren's. What do you tell them when they ask why didn't you stop this horrendous destruction of this beautiful wilderness? Why did allow the air we breathe to become so polluted that you can't go outside. Please do not allow this to happen, nothing is worth the irreversible damage this would do to our environment."

"Cutting down a forest to mine coal? You must be kidding, that's a double injury. You are aware of

global warming, right?"

Tod Jones

OR 97402-3765

"Destroying forests to extract coal which will further raise carbon levels in the atmosphere and further compromise air quality is foolhardy and shows a profound disregard for humanity and the planet."

Robert Jones OR 97302-5212

"I'm physically sick of watching corporations destroying the world for profit. End this now!"

Tyler Jones

"The beauty of nature is more important than your greed. You are a dying industry -- die gracefully."

Canna Jones TN 37996-0001

"Forsaking wilderness for short-term economic gain is a short-sighted, irresponsible approach to any type of business in America. STOP WASTING RESOURCES and make better, longer-benefitting decisions and invest in newer, more efficient technologies. Right now, gas is the lowest price in TWO DECADES! The return is minimal, but the cost is GREAT!! STOP!"

Diana Jones

TN 37865-5736

"Why get rid of these beautiful forests?? They are worth more to this planet than the money being made!!"

Cassie Jones TX 79364-4711

"Please do not allow any Coal company to come into the Colorado Forests. We need these forest for our animals, children, and universe! This would be a major disaster to bulldoze our forest. We need our forest and wildlife for the future! Do not destroy our world any more. Let us enjoy the nature we still have and preserve it for future people to enjoy."

Geraldine Jones UT 84096-5111

"Coal should be thought of like the dinosaurs that created it...a thing of the past. There are better, renewable options. The planet needs the trees!"

Reg Jones

"We're all getting a lump of coal in our stocking this Christmas."

James Jordan CA 94080-5201

"I believe that the time to act responsibly and intelligently has come. That coal MUST BE LEFT IN THE GROUND!!! YOU ARE THE MANAGERS OF OUR COUNTRY'S FUTURE. How long does it take to regenerate destroyed forest land? Will any future generations see again this beautiful forest????? Stop working for company profits!!!! And the addition to CO2 levels is horrible with coal. Where are your consciences!? Stop all coal leases and face realities -conversion to clean energies is our only chance and must start now in a very serious way."

Y.D. Jordan CA 90049

"No bulldozing Pristine roadiess forest in Colorado, NOW And forever!"

S. Jordan

Candace Jorritsma FL 33410-1511

"As a native Kentuckian, please stop this madness. There is no such thing as clean coal!"

Kazimieras Joseph CA 95050-6112

"Bulldozing forests for coal is a climate change double whammy. We need to protect our forests, now more than ever. And we need to encourage renewable energy sources, not dirty coal."

Marc Joseph CA 94402-3840

"Coal must stay in the ground to meet the President's climate goals."

Robert Joseph MN 55107-4026

"Please put a stop to the senseless destruction of our planet--while there still may be time left to do so!"

Ellen Joseph NY 10562-4003

"In tis month of the big climate conference in Paris, it is no longer any secret that we must stop destroying the environment. Pristine roadless woods nurture a habitat integral to the health of our planet. In the name of human entitlement and corporate greed, we have already decimated the world we inherited from our parents. Let us preserve what is left for our children"

William Josephs CA 90046-1619

"Coal is so dirty; and it destroys the environment. ENOUGH!"

Dan Josephson TX 77036-6145

"Pristine wilderness is something to cherish, and we dont want to lose such a wonderful natural beauty. We have already lost too much. Roads would also be a domino effect. Please keep this area pure for our generation and others to follow."

Jennifer Josephy NY 10028-1135

"We should be finding new sources of energy not destroying forests, which are the lungs of our planet."

Sarah Joslin

MA 02556-2828

"As the global climate talks continue in Paris, it is time to examine our own practices in the US and play a

more active role in addressing climate change. It is wrong to reopen a loophole that will add to climate pollution and that will have a negative impact on the forests and the animals that inhabit that wilderness area."

Daniel Jourdan NC 27705-2832

"Please do not allow this beautiful forest to be bulldozed!"

Alan Journet OR 97530-9342

"We know 80% of fossil fuels must be left in the ground if we care about future generations. This proposal is insanity."

Amber Joy

"Help preserve our pristine wilderness from Arch Coal and their impact on destroying natural systems."

Liz Juvet

CA 95425-3978

"Stop, please, with more polluting coal. There are other ways to provide power that is earth friendly, & will not kill as many employee's than the coal industry doe. The miners die horrible deaths from black lung, as do the neighbors of these noxious coal mines. Please quit destroying our environment & the poor, destitute miners who take these deadly jobs, knowing that they will either die from "black lung" or from a mine collapse. Find an industry that is clean to the employee's & to the environment. There ARE other ways to provide power, clean power, keep employee's & their families & nearby forests & wildlife ALIVE. It can & it MUST be done. Like any change, it will be difficult, but when the wrinkles are all worked out, your lives & environment will be so wonderful, you'll wonder WHY you never took this action years ago. Thank you for doing the right thing for ALL living things."

S K

CA 95063-5238

"This is once again an attempt by one company to benefit from the destruction of undamaged habitat while contributing to pollution of the atmosphere resulting in more global warming--another environmental catastrophe. Don't let this happen! Do not allow Arch Coal to bulldoze the roadless forest by reopening a loophole in the Colorado Roadless Rule."

Nipunika Kabadhi NJ 07045-9345

"Climate change is here and we need to act now to minimize the adverse effects. Lets not bulldoze thousands of acres of pristine roadless forests for dirty coal."

Mary Ann Kabaker ND 58727

"This action is not acceptable. I live in North Dakota - and know all about coal - we use it and we need it up here --BUT LEAVE THE ROADLESS FORESTS IN Colorado ALONE!!!"

Leonora Kabala AZ 85641-0905

"Please, we must protect the earth's living mantle without which as a species we cannot continue. The forests

provide both for our safety and our ability to raise our children with our heads held high knowing that we have taken care of them, too ... and their children too. Please help to preserve our own destiny. We need all living entities to gracefully continue into the future. Thank-You!"
Patricia Kadar

Kevin Kaiden IL 60172-4038

"DO NOT ALLOW ARCH COAL TO RAPE THE PLANET WITH DEFORESTATION OF PRISTINE FORESTS AND HABITATS!!!! USING ROADLESS FORESTS AS A LOOPHOLE IS DEVIOUS AND SICKENING AND YOU WILL ACCOMPLISH NOTHING EXCEPT FOR FOREVER RUINING THE FORESTS AND THE NATURAL HABITATS FOR THE ANIMALS THAT MAKE THIS COUNTRY A BEAUTIFUL PLACE TO LIVE."

Kevin Kajetzke NY 10001-6509

"Given the recent promise made by our President, I believe we must limit coal use and mining to a minimum, with the goal of eventually (soon) eliminating its extraction. Please do the right thing here and look toward the future, taking the long run into account. Besides that, we know that one of our main assets in the US is the natural parks system, the natural beauty that makes living here such a pleasure.

Thanks...Kevin"
