Comments:

The direct comment line for this proposal said "error" & would not allow me to comment so hopefully this will work.

The Nellie Juan-College Fiord Wilderness Area in the Chugach National Forest in Alaska is an ecological & scenic treasure. I understand the Forest Service has a proposed plan to loosen protection throughout this wilderness. Please do not allow this proposal to harm the integrity & beauty of this pristine wilderness. Keep vehicles, roads, chainsaws, helicopters, development, etc out of this pristine wilderness. Keep it designated as wilderness. When it is gone, it is gone forever when man keeps interfering.
