Re: Blue Mountain Resiliency Project

We are all for thinning the forest and restoring this dangerous situation to one of health, vigor, and usefulness.

We support the maintaining of current road densities, but are unclear on what roads are currently identified as closed or open on each forest. In order to comment adequately we would need some clarification.

Also, when you refer to "improve existing road networks", does that mean repairing roads to minimize impacts, or decommissioning roads to meet ESA standards , which would affect the local residents?

Thank you for your consideration to the above matters. By all means let's use our natural resources and maintain the forest. We need access to the forest to do so.

Sincerely Mike and Cathy Kaech
