Comments:

I agree that there is a need to reduce fuels and move forests to a more resilient structure, composition, density, and pattern.

However, the road system, both open and closed, should be identified on maps for this public comment period. Please define what you mean by "improving existing road networks" and what will be used to determine "best management practices"?

Supporting your statement of "maintaining current road densities" would be easier for the public if maps of the roads were included.

Sincerely,

Mary Schonsberg
