Comments:

Do not log or put roads through the old growth parts of the forest. The old growth areas are a legacy for future generations and there are few old growth forests left in the world. Also the vast and overwhelming network of roads need to be considered; unneeded roads ought to be restored to forest area.

The biggest issue is that the scope of this project is too large to ponder all of the results that will take places. Please narrow the scope and scale of the project.

Finally, the Wallowa-Whitman forest is fine just as it is. There ought to be no changes made but if there are please do not log the old growth forests.
