Comments:

Dear Madam/Sir: I recently learned of a planned massive cut and burn in Eastern Oregon in the Umatilla, Wallowa-Whitman and Ochoco National Forests. The US Forest Service has announced that it will destroy close to 900 square miles when all is said and done. The question is why? I have not read about any conclusive rational and/or scientific evidence that would support such a hideous plan.

I would like to know who is going to benefit from this proposed cut and burn operation - follow the money and we shall discover the truth. Let us not be hasty in destroying our natural environment and allowing thousands of animals, insects and potential human life to be sacrificed.

Sincerely,

Robert & Theresa Bianchi

North Bonneville, Washington
