Comments:

All road closure maps and proposed road closure maps need to be released to the public to use as resources when out on our public land. We should not be required to keep track of land that is closed in the first place because this is our public land and it is unconstitutional for the government to limit our access to this land. There is no reason that any member of the federal or state government should be withholding information of this sort from any member of the public. This is OUR land.
