To: The Forest Resiliency Project
Blue Mountains Restoration Strategy Team
US Forest Service
72510 Coyote Road
Pendleton, OR 97801

This letter is for the scoping record.

Please send me a hard copy (a paper copy) of your Environmental Impact Statement, any other analysis documents, and any other related documents, and any other notices and decisions related to the Umatilla National Forest in Oregon, the Wallowa-Whitman national Forest, the Ochoco National Forest, and any other forest land in Oregon or Idaho that might be or could be cut, logged, or burned by the US Forest Service.

The timber cutting and burning represent wanton and needless destruction of healthy forest land.

The purpose of the US Forest Service is to protect our forest lands, our wild animals therein, and their habitat.

In no instance whatsoever should the US Forest Service in any way destroy or seek to destroy our forest lands, our wild creatures, and their habitat.

The US Forest Service is operating completely wrongfully in seeking to destroy the three forest lands at issue in Oregon as well as any forest land under their aegis elsewhere in Oregon, Idaho, or other state.

Please cease and stop altogether these wrongful actions and do not permit destruction on your behalf by any other entity.

Yours truly,
Joan Dahlberg
