Comments:

Please accept this letter as a voice of concern over the travel management plan #44918. I understand the need to cycle the use of trails and lands, however I do not agree with removing so much single track trails. As an avid motorcycle trail rider, along with my family of 4, we use this area to spend time together away from everyday life. We have been riding for 20 years and have traveled these trails with motorcycle riders and the newer side by side riders and it is in my opinion that single track use is much less invasive on the land and there are far less single track users than ATV/OHV users. Some of these machines are so big and loud and quite frankly some of the people I have been around on these machines are not as responsible and treat the trails poorly...in fact so much that we won't ride with these crowds very often. I feel that if you are going to leave the larger trails open, then please keep the single tracks available as well. As a motorcycle rider I take pride in showing my children this beautiful land as well as taking care of it!! Thank you!!
