San Juan National Forest/Debbie Kill...NEPA Lead

I am writing as a citizen who has traveled, camped, fished and hiked the areas in question for the last 30 years. I have been increasingly disturbed by the degradation in the quality of this experience by motorized travel, specifically that of motorcycles. Those of us who value quiet in the natural world are being shut out of our public lands by the noise of motorcycles, which can echo for miles, and affect far more than their immediate vicinity. Not to mention the smells, trail degradation, and fear engendered by speeding motorcycles while walking on our public lands.

Specifically, I would like to support the choice of Alternative E. Bear Creek is a pristine area with beautiful fishing and hiking, and it would be a tragedy to breach this area with motorized travel. The East Fork of the Delores is one of the finest fishing streams in the area, and has been degraded significantly by motorcycle traffic.

Unfortunately, motorcycle traffic degrades the experience of all other users, and dominates any area in which it is allowed. And it is a very small percentage of users who affect the majority of users. Please minimize this kind of recreation on land which is to be available to all users.

Thank you for your consideration.
