Comments:

I think all roads in the mountains that are open to motor vehicles should be open to all, including ATV recreational vehicles. We ride in the mountains and love seeing animals, trees, creeks, etc. What we don't enjoy are the deep ruts left by large trucks. We have tires designed for the hills and they don't dig deep ruts. We are responsible and clean up any areas that we see have been disrespected by others. We recommend that you proceed with proposal D.

Thanks for your help in making our forests safe.
