Comments:

I believe that the Naches area needs to remain a multi-use area. Having lived in Washington all my life, I have enjoyed motor cycle riding, jeeping, atv useage hunting and fishing as well as hiking. All of these activities require motorized access. This unique area has served my family for over 50 years. I am against a massive closure to motorized access and support an alternative B solution or one similar where every one has full access. This does not preclude closure of damaged localized areas. Make use of local clubs and volunteers to clear, clean and maintain roads and trail.
