Travel Management - Rico West Dolores Roads and Trails Project #44918

I am submitting my comment here for this travel management proposal, I'm having issues with the site link not working.

My name is Deven Serr and I am an Equal opportunity National Forest user. I enjoy these public lands like everyone else does, I access these glorious places by any means available. I do not despise this user group or that user group. I do not favor one form of access over another, the forest service should not favor one means of travel over another either. I do not understand people controlling other people because of a lack of understanding and selfishness. For the West Dolores-Rico area I am aware of its special opportunity to motorcycle users to ride in such an amazing place for a very long time in history. If Zions national park officials decided that any and all hikers can no longer access the subway that would be a major problem. I feel also that looking at maps of the San Juan mtn range this is the only trail, the Calico trail, that is a high alpine pristine wilderness single track trail that is available to motorcycle use in the whole mtn range, that's a big problem. It needs to remain open to responsible motorcycle use. It needs a moto group to adopt this trail for repairs and maintenance on a regular basis to prevent extensive wear and tear to the area. I support Alternative A and E with the exception that the northern most section of the Calico trail remain open to motorcycles.

Thankyou,

Deven Serr
