Forest Service managment plan

I'm very disappointed in the forest service assessment of the dirt biker's impact on our national forests. Off road vehicles like ATVs and Dirt Bikes run the wildlife out of the area. I would think Hunters would get more consideration since they fund your entire budget. You failed to address how you are going to maintain the current hiking trails, which have been destroy or how you are going to prevent dirt bikers from riding off trail and creating new ones. If you had taken the time to walk the upper basin in Burnett Creek you would see numerous new motorcycle trails have been created. Another area I have run into Dirt Bikers is the trails on Telescope Mountain which have never been open for Dirt Bikers. I'm not in favor of motor cycles maintaining were they currently ride or giving them additional areas to operate.
