PHONE: Greg Wahl at 360-956-2375

Dear Ms. Laford,

I SUPPORT the pending decision by the Forest Service to grant a five-year special use permit to the US Navy to conduct electronic warfare in the Olympic National Forest, for the following reasons,

- a) The Navy has made a clear, convincing case that electronic warfare training in the Olympic Peninsula builds upon current airspace already legally allowed by CONGRESS who created the Olympic Military Operating Area or MOA.
- b) Progressive agitation should NOT make national security decisions. National security professionals working within the confines of CONGRESS and the best knowledge at hand should be making national security decisions.
- c) We need to provide the best possible training for our troops to defend human rights for ALL humans. Not coddle moneyed interests who can afford prime property or progressive agitators who have made clear anti-Navy, anti-America biases.
- d) <https://youtu.be/zo2bcDRkMQ> is a US Navy YouTube I ask you please review in support of the EW training. Explaining why the training and the safety measures taken to protect civilians from any true harm.

Now if this training could realistically be done in places other than the Olympic Peninsula I'd support that. But quite frankly, my Navy friends have sufficiently assured me the time for that conversation has passed. No further time is necessary, please close the comment period.

Respectfully;

Joe A. Kunzler
