Re: Objection Pacific Northwest Electronic Warfare Range (EWR)

More Specifically Re: The Draft Decision Notice and Finding of No Significant Impact (DN/FONSI) issued on November 29, 2016, by the Responsible Official, Dean Millet, the District Ranger of the Pacific Ranger District of the Olympic National Forest, which is the affected National Forest

Dear Reviewing Officer and District Ranger:

I have been a resident of Port Angeles since 1993. I live and work directly under the flight path of Growler aircraft. These fly overs have ruined the tranquility of the Olympic Peninsula. There are days that feel more like I moved to the edge of a war zone rather than the edge of a National Park, a wilderness area, a world heritage site, a biosphere reserve. My home shakes from aircraft turbulence, I have to yell to be heard when planes are flying overhead. Why on earth are you hell bent on allowing the Navy to practice electromagnetic radiation war games in one of the quietest and most pristine places on the planet? How would you feel if I came into your church and started up a lawn mower during communion? That's how it feels. This is sacrilegious behavior bordering on insane.
