Comments:

Please DO NOT allow forest service roads to be used for equipment involved in electronic warfare activities! We hike and fish these areas, and count on them to be remote and as pristine as possible, for the benefit of the animals, fish and the forest ecology in general. We do not know the effect of the electromagnetic signals envisioned on living creatures, nor do we want to run into some van with antennas protruding around any forest road corner. For several months now, my husband and I have already had our cell phone map and weather apps disrupted while driving between Elma and Humptulips, for reasons unknown. Something keeps placing us north of Montesano, where we have not been. If the Navy is already doing maneuvers in this area, they should know that they are disrupting potentially life-saving GPS information for people near-by. Please, NO ELECTRONIC WARFARE PRACTICE IN THE NATIONAL FOREST! Thank you.
