Comments:

I was very alarmed to hear that at the military proposal is planning to add more growlers to its fleet.

First of all, EMFs are EXTREMELY dangerous to all living things on this planet.

Why on earth is there a decision to increase exposure to us ALL through electronic warfare?

Secondly what about the noise pollution?

Finally why is this being pushed through at the busiest time of year i.e Christmas and into the New Year when ordinary citizens are distracted with the busy-ness of the season? I find this highly suspicious planning on the part of the US military.

You can not prove that any of these concerns listed are safe to human life, birds and animals, and the environment. They simply are not.

This must Cease and desist immediately.
