Comments:

I am requesting an extension to the deadline for submission of public objections to the proposed electromagnetic warfare range over ONP/ONF. The current scheduling by ONF is purposefully designed to subvert the intent/spirit of NEPA by minimizing the public opposition to this proposal which has been already been recorded by 3,000+ individuals at the rate of over 220 letters of opposition to every one of support for the draft EIS. To schedule this deadline immediately following the busiest possible time of year for families most negatively affected by this proposal reflects a lack of good faith by leadership within ONF and directly undermines public trust in government. An additional 60 days is in order!
