Nantahala Forest plan revision public comment meeting

Thanks to the Forrest Service for the "pre-draft" public comments meeting.

As a property owner near Tusquittee Bald I support the creation of a wilderness area designation as shown on the proposed study area. I would also support extending the area to encompass all of the area from the fires creek rim trail to the southeast FS boundary.

Much of the area affected by last years fires is on the opposite side of tusquittee creek but is evident this spring and summer. Although much of the burned area did not progress as a crown fire, a lot of the mature hardwoods have died. I guess the fire was hot enough and the soil profile so thin the trees were killed but not fully burned.

Thanks for listening,

Matt Trout
