Comments:

Dear Mr. Padilla,

Thank you for the opportunity to comment on this project, as I believe public engagement is critical in such processes. As an avid hiker and birder, I am concerned at the prospect of losing the quietude afforded by non-motorized designations. Not only will motorized vehicles affect the quality of ambient air, but it will also create noise pollution in areas valued as sanctums. Allowing for increased motorized access benefits the much smaller cohort of motorized users at the expense of the much larger group of non-motorized patrons. For such reasons, I support Alternative E with modifications, if the SDEIS is found to be non-deficient - please refer to Sheep Mountain Alliance's suggested modifications. Thank you for your consideration.

Sincerely,
Joseph Cullen
