Comments:

With regard to the upper Dolores River areas and specifically Upper Calico trail and Bear Creek trail... I would like to argue for greater consideration of nonmotorized quiet users. User conflicts are increasing with more motorized bikes...essentially motocross. These are not only noisy and disturbing to the quiet I go to these areas to enjoy; but these vehicles tear up the trail leaving loose rocks and bare roots. I am an older hiker and these unnecessary hazards make navigating trails more difficult. We need nonmotoized alternatives.

Thank you,
Becky Siefer
