Pisgah-Nantahala Forest

The beautiful 1.1 million acres of this National Treasure that is the Pisgah-Nantahala Forest is certainly large enough to accommodate the needs and desires of all competing points of view! Please encourage the decision makers to be equitable in all areas and not be swayed by money or greed. Smart decisions now will save this area for future generations as well as provide for the needs of all concerned today and for many years to come. The plan provided by the Forest Partnership compromised to come to an understanding between differing factions. The Stakeholders Forum seems to be favoring special interests. This land is our valuable American land and should be used fairly with the broadest interests of all concerned represented and carefully considered. Please do what is RIGHT for today and all the tomorrows to come. It's a direction not followed much these days but you can do it if you try!

Linda Frary, Florida resident and grateful recent visitor to this special
National Forest.
