Comments:

Please foster a volunteer force of mechanical weed pulling. We want to keep Prince of Wales pesticide free. I strongly believe that EPA and USDA have accepted Monsanto research rather than doing their own. I believe that we are at a turning point in American Society to question the safety of pesticides.

Prince of Wales has been pesticide free. We have done manual extraction 2 years in a row. We believe we would be even more effective if we could volunteer right along with the Forest Service. Glyphosate is not safe. I have taken a pesticide residual test and hope to give you the results when I get them.
