Comments:

Tens of thousands of acres of commercial logging and the application of herbicide will absolutely negatively impact the public's ability to use and enjoy the Chattahoochee National Forest.

I, however, do support the agency's proposal to set aside 5,050 acres of old growth, and improve soil and water quality through decommissioning and upgrading roads that are sediment sources.

The Forest Service should take the time to fully evaluate the impacts of this proposed project, including site-specific impacts, before making any final decisions.

Please preserve these public lands for public use and enjoyment!
