Phone: 907-586-8212

Comments:

Every administrative leverage must be applied to halt this incremental obfuscation of the "Road-less Rule" in the Tongass National Forest! It's bad enough for the health of this largest deciduous Rainforest that its fertility will be harmed by the other wise nutrient rich deposits that salmon provide, if their 'runs' were at their sustainable levels, but without THAT, now adding the increase of human incursion will not only demean its "polar value" but curtail the Planet System Dynamics in ways we, humans, are too ignorant to currently recognize!
